## NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

### ***General disclaimer***

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the secretariat of the United Nations concerning the legal status of any country, territory, city or area, or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Where the designations "economy" or "country or area" appear in tables, they cover countries, territories, cities and areas.

The designations "developed", "in transition" and "developing" are intended for statistical convenience and do not necessarily express a judgement about the stage reached by a particular country or area in the development process.

Material in this publication may be freely quoted or reprinted, but acknowledgement is obligatory, together with a reference to the document number (TD/STAT.33). A copy of the publication containing the quotation or reprint should be sent to the UNCTAD secretariat.

The *UNCTAD Handbook of Statistics* provides essential data for analysing world trade, investment, international financial flows and development. Reliable statistical information is often the first step when preparing recommendations or taking decisions that will commit countries for many years as they strive to integrate into the world economy and improve the living standards of their citizens. Whether it be for research, consultation or technical cooperation, UNCTAD requires comparable, often detailed economic, demographic and social data, available if possible over several decades and for as many countries as possible.

In addition to collecting and checking data and calculating related indicators that facilitate the work of the secretariat's economists, the *UNCTAD Handbook of Statistics* provides an opportunity to share a rich statistical database with decision-makers and research specialists – academics, officials from national Governments or international organizations, executive managers or members of NGOs from developing, transition or developed countries. The *Handbook* further offers journalists comprehensive information in a presentation that meets their needs.

In order to provide maximum benefit to all users, the publication is available in three complementary formats: printed copy, DVD and online ([www.unctad.org/statistics/handbook](http://www.unctad.org/statistics/handbook)).

Particular acknowledgement is due to the Statistics Division of the Department of Economic and Social Affairs of the United Nations, as well as to other international organizations, for their help in preparing this publication.

Le but du *Manuel de statistiques de la CNUCED* est de fournir les données statistiques essentielles à l'analyse du commerce mondial, de l'investissement, des flux financiers internationaux et du développement. Une information statistique fiable est souvent le préalable à la formulation de recommandations et à la prise de décisions qui engageront les pays pour de longues années dans leur processus d'intégration dans l'économie mondiale et l'amélioration des conditions de leurs peuples. Que ce soit pour la recherche, la concertation ou la coopération technique, la CNUCED a besoin de données économiques, démographiques et sociales comparables et souvent détaillées, disponibles si possible sur plusieurs décennies et sur un maximum de pays.

Au-delà de la mobilisation et de la vérification des données, du calcul d'indicateurs dérivés qui alimentent les travaux des économistes du secrétariat, le *Manuel de statistiques de la CNUCED* est l'occasion de partager une base statistique riche les décideurs et les chercheurs, qu'ils soient universitaires, fonctionnaires d'administrations nationales ou d'organisations internationales, cadres d'entreprises ou membres d'organisations non gouvernementales de pays en développement, en transition ou développés. Les journalistes trouvent aussi dans ce manuel une information synthétique dans une présentation bien adaptée à leurs préoccupations.

La publication est disponible dans trois formats complémentaires, l'édition imprimée, le DVD et la version en ligne ([www.unctad.org/statistics/handbook](http://www.unctad.org/statistics/handbook)), pour que chaque utilisateur, où qu'il soit, puisse en tirer le meilleur avantage.

Le secrétariat de la CNUCED tient à remercier la Division de statistique, Département des affaires économiques et sociales de l'ONU, et diverses organisations internationales du concours qu'elles ont apporté à la préparation de cette publication.

These notes summarize the content of each part of the *Handbook* according to the revised Table of Contents of the present issue of the *Handbook of Statistics*.

The tables included in this book represent analytical summaries of the full time series contained in the *UNCTAD Handbook of Statistics 2008* on DVD and on the statistics portal of the UNCTAD website at [www.unctad.org](http://www.unctad.org). In certain instances, the two electronic versions might contain different figures from the printed volume, as they are published somewhat later and may reflect more recent data.

### PART ONE

#### International merchandise trade

Tables 1.1 show the value of total exports and imports, expressed in millions of dollars and percentages of the world total, of individual countries and geographical regions (1.1.1), economic groupings (1.1.2), and trade groups (1.1.3). The trade flows shown in table 1.1.1 refer to the General Trade System except for the countries which employ the Special Trade System and which are marked with an asterisk. The General Trade System is used when the statistical territory of a compiling country coincides with its economic territory. Consequently, imports include all goods entering the economic territory of a compiling country and exports include all goods leaving the economic territory of the compiling country. The Special Trade System is used when the statistical territory comprises only a particular part of the economic territory within which "goods may be disposed of without customs restriction". In such a case, imports include all goods entering the free circulation area of the compiling country, which means cleared through customs for home use, and exports include all goods leaving the free circulation area of a compiling country.

Average annual growth rates of international trade derived from table 1.1 are presented in tables 1.2.

Tables 1.3 contain trade balances (exports f.o.b. minus imports c.i.f.) and these balances, as a percentage of imports of individual countries, geographical regions and economic groupings.

Table 1.4 shows the relative importance of trade among group members as compared to the regional or total trade of that group.

### PART TWO

#### International merchandise trade by region

Table 2.1 shows the export and import structure of individual countries by main regions of origin and destination. Data are presented for as many individual countries as possible, while trade partners are grouped in 14 major clusters.

Table 2.2 presents the structure of exports by destination and imports by origin by major commodity groups for 12 selected country groups. The table provides detailed information on the world trade network for 19 regions of origin and destination and six commodity groups.

Totals of international merchandise trade presented in the tables found in parts one and two are not strictly comparable due to complementary but different sources and remaining unallocated trade flows, despite efforts to distribute trade flows by destination, origin and commodity group.

Exports by destination may differ considerably in some cases from data on imports as reported by countries of destination for a variety of factors, among which the following may be of particular importance:

- Most import data are reported on a c.i.f. rather than an f.o.b. basis.
- There is a time lag between the date on which goods are recorded as exports and their arrival at their destination;
- There may be considerable differences between the recorded destination of exports and the actual destination as shown in import statistics.

### PART THREE

#### International merchandise trade by product

Table 3.1 shows the export and import structure of individual economies by commodity groups for selected years for nine commodity groups (total, all food items, agricultural raw materials, fuels, ores and metals, manufactured goods, including chemical products, machinery and transport equipment and other manufactured goods).

Tables 3.2 (A, B and C, respectively) present the structure of exports for the world and for developed and developing economies, by product, at the SITC group (Revision 3, 3-digit) level. Each product share of world exports is calculated for each economic grouping as well as the average annual growth rate and the latter's deviation in relation to the world growth rate.

Table 3.2D establishes for each economy the list of main products exported (SITC group Revision 3, 3-digit level). Each product's share of total exports of individual countries, geographical regions and the world is also indicated.

Table 3.2E lists major exporters of 70 leading products among developing economies at the SITC group (Revision 3, 3-digit) level as well as corresponding shares in world trade.

Table 3.3 provides concentration indices and structural change indices for exports and imports by product group at SITC (Revision 3, 3-digit) level. The first indicator shows how a product market is concentrated in a few countries or homogeneously distributed among several countries. The structural change indicator shows whether the market share for a given product among export countries has changed significantly when compared with a reference year.

Totals of international merchandise trade presented in the tables of this third part may also differ from the data contained in the first and second parts for the above reasons, to which must be added margins of exports and imports not distributed by commodity group or the use of different product nomenclatures by the exporting and importing countries.

### PART FOUR

#### International merchandise trade indicators

Tables 4.1 include calculation results of concentration and diversification indices for individual countries, geographical regions and economic groupings. This concentration index specifically shows how exports and imports of individual countries or country groupings are concentrated on several products or otherwise distributed in a more homogeneous manner among a series of products. The diversification indicator signals whether the structure of exports or imports by product of a given country or country grouping differs from the structure by product shown for the world.

Tables 4.2 contain volume indices of exports and imports, rounding out the unit values available in tables 1.1 and 1.2, and derived terms of trade and purchasing power of exports calculated at the level of individual countries and geographical regions (4.2.1) and economic groupings (4.2.2).

To improve data coverage, especially for the latest periods, the following procedure was used in the calculation of unit value indices::

- A set of average prices indices at SITC (Revision 3, 3-digit) group level was constructed using available sources.
- At the country level, unit value indices were calculated using previous year's trade values at the SITC 3-digit level available in table 3.2 as weights.

In some instances these indices may differ from the estimates published in official sources, since the main aim is to provide tentative estimates for most developing countries on a comparable basis.

Table 4.3 presents average applied import MFN tariff rates for major categories of non-agricultural and non-fuel products by individual markets.

## PART FIVE

## International trade in services

Tables 5.1.1, 5.1.2, and 5.1.3 present the value of total trade in services by individual country, geographical region, economic grouping and trade group. The tables show values of exports (credits) and imports (debits) of services that were derived from statistics on international service transactions as presented in the IMF's *Balance of Payments Statistics*. Services are defined as the economic output of intangible commodities that may be produced, transferred and consumed at the same time. However, services cover a heterogeneous range of intangible products and activities that are difficult to capture within a single definition and are sometimes hard to separate from goods. Services are outputs produced to order, and they typically include changes in the condition of the consumers realized through the activities of the producers at the demand of customers. By the time production of a service is completed, it must have been provided to a consumer.

Services figures shown here comprise 11 principal services categories according to the concepts and definitions of the IMF *Balance of Payments Manual* (BPM5, 1993). These categories cover transport; travel; communications; construction; insurance; financial services; computer and information services; royalties and license fees; other business services; personal, cultural and recreational services; and government services n.i.e. Given the general difficulties involved in statistically capturing certain aspects of the trade in services, the balance-of-payments figures presented here may be somewhat downward-biased as compared with the actual value of the international trade in services. The aggregate data from tables 5.1 include the UNCTAD secretariat's estimates of missing values that are not shown separately.

Table 5.2 indicates 20 major exporters and importers, among developing economies, for each of the 10 principal services sectors as defined in the IMF *Balance of Payments Manual* (BPM5, 1993), which are transport; travel; communication; construction; computer and information services; insurance; financial services; royalties and licence fees; other business services; and personal, cultural and recreational services. Government services n.i.e. are not included.

Table 5.3 focuses on tourism services in individual countries in recent years. It presents the following statistics: value of total expenditure of visitors, value of visitors' expenditure excluding transportation, number of tourists' overnight stays, and number of arrivals of visitors. All figures refer to non-resident visitors (inbound tourism). The international (non-resident) visitor is an international traveller travelling to a place other than her/his usual environment for a stay of less than 12 months and whose main purpose of a trip is other than exercise an activity remunerated from within the place visited. This includes all persons who arrive in a particular economy to stay for less than a year for business purposes or personal reasons. Tourists are those who stay at least one night in a collective or private accommodation in the country visited. Same-day visitors are persons who do not stay overnight in a country visited.

Table 5.4 concerns international maritime transport. It contains data on the world merchant fleet by flag of registration and by type of ship by region and economy, highlighting the group of major open-registry countries. A ship owner who registers his or her vessel in an open-registry country does not need to have any connection with a country of registry. The number of open-registry countries has varied over the years. In order to better show their relevance, the group of "major open- and international-registry countries" now includes a higher number of countries (10 in total) than the one described in the previous versions of the *Handbook*. Table 5.4 contains consolidated time series from various issues of the UNCTAD *Review of Maritime Transport*. It reports on the worldwide evolution of shipping, ports and multimodal transport related to the major traffics of liquid bulk, dry bulk and containers.

## PART SIX

## Commodities

Table 6.1 includes aggregated price indices for primary commodity groups such as food, tropical beverages, vegetable oilseeds and oils, agricultural raw materials and minerals, ores and metals, as well as an all groups price index in current US dollars. Also included are the annual and quarterly free-market price indices for selected commodities exported by developing economies. The weight of price indices for the above mentioned commodity groups (2000=100) are based on the value of exports of developing countries from 1999 to 2001. The table is based on data from the *UNCTAD Commodity Price Statistics* database, available on the statistics portal of the UNCTAD website.

Table 6.2 presents instability indices and trends in free-market prices for selected primary commodities that are of particular interest to developing economies.

Table 6.3 presents information on the production of aluminium and copper at different processing stages and consumption by individual country and by geographical region. Figures for the production of bauxite are expressed at gross volume, while those for copper ore production are shown in metal content.

## PART SEVEN

## International finance

Table 7.1 presents summaries of the current account of the balance of payments for individual countries and territories. Balance-of-payments current account data cover all transactions between residents and non-residents of a reporting economy, involving economic values and mainly concerning goods, services, income and current transfers. Data on these principal categories, with an additional detail on direct investment income, are covered in the table. For information about the concepts regarding the categories mentioned, please see the IMF *Balance of Payments Manual* (BPM5, 1993).

Table 7.2 contains summaries of the capital and financial account of the balance of payments for individual economies. Capital and financial account figures cover transactions in foreign assets and liabilities. Assets represent claims on non-residents, while liabilities are indebtedness to non-residents of the reporting economy. No valuation changes or other non-transaction modifications of net foreign assets are reflected in these accounts. Capital account includes capital transfers and acquisition and disposal of non-produced, non-financial assets. Financial account covers investments (direct, portfolio and other) and reserve assets (comprised of monetary gold, SDRs, foreign exchange and others). Statistics on these principal categories of the capital and financial account are included in the *Handbook*. Detailed notes with explanations of categories and terminology used are provided after the table. For more information, see the IMF *Balance of Payments Manual* (BPM5, 1993).

Tables 7.3.1, 7.3.2 and 7.3.3 contain information on foreign direct investment (FDI) inflows and outflows by individual country, geographical region, economic grouping and trade group. These figures correspond to the Statistical Annexes of the UNCTAD *World Investment Report 2006: FDI from Developing and Transition Economies: Implications for Development*. Foreign direct investment (FDI) is defined as an investment involving a long-term relationship and reflecting a lasting interest in and control by a resident entity in one economy (foreign direct investor or parent enterprise) of an enterprise resident in a different economy (FDI enterprise or affiliate enterprise or foreign affiliate). Such investment involves both the initial transaction between the two entities and all subsequent transactions between them and among foreign affiliates. A direct investment enterprise is defined as an incorporated or unincorporated enterprise in which the direct investor, resident in another economy, owns 10 percent or more of the ordinary shares or voting power (or the equivalent).

Table 7.4 presents values of receipts and payments of workers' remittances for individual economies. It also shows workers' remittances as a percentage of international trade (exports and imports, balance-of-payments data). According to the definition of the IMF *Balance of Payments Manual (BPM5, 1993)*, workers' remittances are goods and financial instruments transferred by migrants living and working (considered to be residents) in a new economy to residents of the economy in which the migrants formerly resided. A migrant must live and work in the new economy for more than one year to be considered a resident there. The *BPM5* classifies workers' remittances separately from compensation of employees. Table 7.4 includes the sum of the two categories in the values shown, in order to present a clearer picture of the flows that enter or exit economies via transfers by migrant or non-resident workers.

Table 7.5 presents data on international reserves (total reserves minus gold) of developing economies by country, region and economic grouping. Other calculations included show months of imports that these reserves could finance at current import levels, as well as the annual change in total reserves. According to the IMF definition, total reserves minus gold consist of the sum of the country's foreign exchange, its reserve position in the IMF and the US dollar value of SDR holdings by its monetary authorities.

Table 7.6 gives a summary of official financial flows to developing economies by type of flow, country, geographical region and economic grouping. Flows from bilateral and multilateral sources are shown as recorded by the Development Assistance Committee (DAC – OECD).

Table 7.7 presents time series on the external long-term indebtedness of developing economies for major economic groupings. It also provides a detailed breakdown of public and publicly guaranteed debt by source of lending. External debt data in this table are based on the Debtor Reporting System (DRS) maintained by the World Bank.

### PART EIGHT

#### Development indicators

Tables 8.1 provide information on total and per capita nominal GDP by individual country, geographical region and economic grouping. The GDP figures in dollars are derived from GDP data provided in national currencies. The prevailing annual average market exchange rates, as reported by IMF, have been used for the conversion from national currencies to dollars for most countries.

Tables 8.2 contain annual average growth rates of total and per capita real GDP by individual country, geographical region and economic grouping. The growth rates are based on GDP in constant 1990 dollars.

Tables 8.3 provide data on GDP by type of expenditure and kind of economic activity, by individual country, geographical region and economic grouping.

Tables 8.4 provide data on population and labour force: total population, urban population as a percentage of total population, total labour force, female labour force as a percentage of total labour force, total agriculture labour force and female labour force as a percentage of total agriculture labour force.

Basic population and labour data are rounded out by the demographic indicators in table 8.5: population growth rate, natural increase rate per 1,000 inhabitants, net migration rate per 1,000 inhabitants, crude birth and death rate per 1,000 inhabitants, infant mortality rate per 1,000 live births and life expectancy at birth.

#### OTHER NOTES

Unless otherwise specified, country aggregates are the sums of the relevant country data by group. Calculations of aggregates may in some cases include data estimated by the UNCTAD secretariat that are not necessarily all reported separately.

Because of rounding, details and percentages in tables do not necessarily add up to totals.

Data were collected and checked to ensure that they matched the geographical coverage of the countries, as described at the beginning of the *Handbook*. However, some gaps could not be avoided due to data unavailability and are described in the notes at the end tables.

Unless otherwise stated, dollars (\$) refer to US dollars and data in dollars are expressed in current US dollars of the year to which they refer.

Average annual growth rates are defined as the coefficient  $b$  in the exponential trend function  $y = ae^{bt}$  where  $t$  stands for time. This method takes all observations in a period into account. Therefore, the resulting growth rates reflect trends that are not unduly influenced by exceptional values.

#### EXPLANATION OF SYMBOLS

- 0 Zero means that the amount is nil or negligible.
- The symbol underscore indicates that the item is not applicable.
- .. Two dots indicate that the data are not available or are not separately reported.
- Use of a hyphen between years (e.g. 1985-1990) signifies the full period involved, including the initial and final years.
- (e) Estimate
- (p) Provisional data
- (r) Revised data

Some exceptions are indicated in footnotes.

The country distributions presented are for statistical convenience only and follow those used by the Statistics Division, Department of Economic and Social Affairs (DESA), of the United Nations. They are grouped by economic criteria or by adhesion to commercial agreements for the purpose of statistical analysis and research.

The term "economies", as used in this publication, refers to regions, countries and territories.

Country-level data are included where statistics have been reported or where it was possible to make an estimate.

### 1. Geographical regions, countries and territories

This section includes countries and territories divided into three major categories: developing countries, economies in transition and developed economies. Each category is further divided by geographical regions.

#### Developing economies:

This category includes countries and territories in America, Africa, Asia and Oceania not specified below. The geographical regions are further subdivided into subregions in order to present more detailed statistics. Exceptions are specified in table footnotes.

#### Economies in transition:

The economies in transition are subdivided between Asia and Europe.

#### Developed economies:

This category is subdivided into 4 geographical regions: America, Asia, Europe, and Oceania.

### 2. Economic groupings of developing countries

The *Handbook* provides numerous and varied groups of countries and territories in order to provide easy access to the statistics necessary for socio-economic analysis and development research.

Developing economies are presented at three levels of aggregation: the total group, the group excluding China (referring to continental China) and the group excluding the least developed countries.

The developing economies are also categorized into three subgroups according to their per capita GDP in 2000: high-income, middle-income and low-income. This breakdown is based on GDP and population data available in 2004 and was not revised in order to maintain the composition of the groups for several editions of the *Handbook of Statistics*.

The category of heavily indebted poor countries (those economies benefiting from the HIPC debt reduction initiative of the World Bank and the International Monetary Fund) includes 40 countries.

Least developed countries and landlocked developing countries are recognized by the United Nations as categories that require special attention from the international community.

Since 1994, the United Nations recognizes the particular problems of the Small Island Developing States (SIDS), even though the criteria for drawing up an official list of SIDS have not yet been determined. The unofficial list is used by UNCTAD for analytical purposes only.

The group of major petroleum exporters consists of countries whose share of petroleum and petroleum products was not less than 50 per cent of their total exports, and whose exports of these products amounted to a minimum average of US\$ 2 billion for the period 2003–2005. This group is divided into three geographical zones: Africa, America and Asia.

The group of major exporters of manufactured goods, divided into two geographical zones, America and Asia, consists of economies whose share of manufactured products was not less than 50 per cent of their total exports, and whose exports of these products amounted to a minimum average of US\$ 22 billion for the period 2003–2005.

The composition of the groups of emerging economies (in America and Asia) and newly industrialized economies (composed of first and second tier) corresponds to UNCTAD's *Trade and Development Report*.

The different geographical regions are also presented at various levels of aggregation:

- *Africa*: Northern Africa excluding Sudan, sub-Saharan Africa, including Sudan, including and excluding South Africa.
- *America*: Central America and Greater Caribbean Islands excluding Puerto Rico, including and excluding Mexico, South America and Central America, and South America excluding Brazil.
- *Asia*: Eastern and South-Eastern Asia excluding China, and Southern Asia excluding India.

### 3. Trade groups and interregional groups

Statistics of trade groups with special analytic interest are presented according to their pertinence. These groupings include all relevant economies and are subclassified by geographical regions, with the exception of following interregional groups: African, Caribbean and Pacific Group of States (ACP); Asia–Pacific Economic Cooperation (APEC); Black Sea Economic Cooperation (BSEC); and Commonwealth of Independent States (CIS).

## NOTES GÉNÉRALES

Ces notes générales présentent le contenu de chaque tableau du Manuel de statistiques ainsi que les modifications introduites dans cette nouvelle édition, s'il y a lieu.

Les tableaux inclus dans cette publication constituent un résumé analytique des séries chronologiques complètes publiées dans le Manuel de statistiques 2007 de la CNUCED sur DVD et dans la version en ligne sur le portail des statistiques du site internet de la CNUCED à l'adresse suivante : [www.unctad.org](http://www.unctad.org). Toutefois les données disponibles dans les versions électronique et imprimée pourront, dans certains cas, être différentes en raison de leur mise à jour et de leur publication à des dates différentes.

### PREMIÈRE PARTIE

#### Commerce international des marchandises

Les tableaux 1.1 donnent la valeur des exportations et des importations totales de marchandises, exprimée en millions de dollars et en pourcentage du monde, des pays et régions géographiques (1.1.1), groupements économiques (1.1.2) et groupements commerciaux (1.1.3). Les flux du commerce présentés dans le tableau 1.1.1 se réfèrent au Système du Commerce Général, à l'exception des pays et territoires qui utilisent le Système du Commerce Spécial et qui sont munis d'un astérisque. Le Système du Commerce Général est utilisé lorsque le territoire statistique d'un pays coïncide avec son territoire économique, et en conséquence, les importations comprennent tous les biens admis sur le territoire du pays déclarant et les exportations tous les biens qui le quittent. Le Système du Commerce Spécial est utilisé lorsque le territoire statistique ne comprend qu'une partie du territoire économique à l'intérieur de laquelle « les biens peuvent être écoulés librement sans restriction douanière ». Dans ce cas, les importations comprennent tous les biens qui entrent dans la zone de libre circulation du pays déclarant, c'est-à-dire qui ont été dédouanés pour mise à la consommation et les exportations comprennent tous les biens qui quittent la zone de libre circulation du pays déclarant.

Les taux d'évolution annuels moyens du commerce international des marchandises, calculés à partir des valeurs des tableaux 1.1, figurent dans les tableaux 1.2.

Les tableaux 1.3 présentent les balances commerciales (exportations f.a.b. moins importations c.a.f.), ainsi que ces mêmes balances en pourcentage des importations des pays, régions géographiques et groupements économiques.

Le tableau 1.4 indique l'importance des échanges entre pays membres de groupements commerciaux par rapport aux exportations régionales et totales de ces groupements.

### DEUXIÈME PARTIE

#### Commerce international des marchandises par régions

Le tableau 2.1 présente la structure des exportations et des importations des pays par régions de destination et d'origine. Le plus grand nombre possible de pays en développement sont inclus tandis que les partenaires commerciaux sont regroupés en 14 groupes considérés comme particulièrement importants pour l'analyse du commerce international.

Le tableau 2.2 indique la structure des exportations par destination ainsi que des importations par origine et par groupes de produits pour le monde et une sélection de 12 groupements de pays. Le tableau fournit une information détaillée sur le réseau du commerce international avec le monde, 19 régions d'origine et de destination, et pour six différents groupes de produits.

Les totaux du commerce international des marchandises présentés dans les tableaux des première et deuxième parties ne sont pas strictement comparables en raison de sources complémentaires mais différentes et d'une marge d'exportations et d'importations non distribuées, en dépit des efforts déployés pour répartir les flux commerciaux par destinations et origines.

Les exportations ventilées par destinations peuvent accuser un écart parfois considérable par rapport aux importations déclarées par les pays destinataires en raison de divers facteurs dont les plus importants sont les suivants :

- Les importations sont déclarées en principe "valeur c.a.f." plutôt que "valeur f.a.b".
- Les importations de marchandises peuvent arriver à destination et être enregistrées longtemps après la date de leur enregistrement à l'exportation.
- D'importantes différences peuvent exister entre la destination des exportations déclarée par les pays exportateurs et la destination réelle telle qu'indiquée dans les statistiques d'importation.

### TROISIÈME PARTIE

#### Commerce international des marchandises par produits

Le tableau 3.1 fournit la structure des exportations et des importations des pays par produits classés en 9 groupes (total, produits alimentaires, matières premières d'origine agricole, combustibles, minerais et métaux, produits manufacturés, dont produits chimiques, machines et matériel de transport, articles manufacturés divers) pour plusieurs années.

Les tableaux 3.2A, B et C présentent respectivement les exportations du monde, des économies développées et en développement, par produits à un niveau très détaillé (CTCI révision 3, position à trois chiffres). Les parts que représente chaque produit dans les exportations du monde et de la région, sont calculées pour chaque groupe d'économies, ainsi que le taux annuel de croissance et l'écart de ce dernier par rapport au taux de croissance mondial.

Le tableau 3.2D établit, pour chaque économie, la liste des principaux produits qu'elle exporte (CTCI révision 3, position à trois chiffres). La part de chaque produit dans le total des exportations du pays, de la région et du monde est également indiquée.

Le tableau 3.2E liste les plus gros exportateurs de 70 produits parmi les produits les plus exportés par les économies en développement (CTCI révision 3, position à trois chiffres), ainsi que les parts correspondantes dans le commerce mondial.

Le tableau 3.3 fournit les indices de concentration et de changements structurels des exportations et des importations des produits au niveau de la CTCI (révision 3, position à trois chiffres). Le premier indicateur a vocation à montrer comment le marché d'un produit est concentré sur quelques pays ou réparti de façon plus homogène entre les pays. L'indicateur de changement structurel indique si la répartition du commerce d'un produit entre les pays exportateurs ou importateurs a connu une évolution importante par rapport à une année de référence.

Les totaux du commerce international des marchandises présentés dans les tableaux de cette troisième partie peuvent aussi être différents des données des première et deuxième parties pour les raisons précédemment citées, auxquelles il convient d'ajouter des marges d'exportations et d'importations non distribuées par groupes de produits ou l'utilisation de nomenclatures différentes de produits par le pays exportateur et le pays importateur.

### QUATRIÈME PARTIE

#### Indicateurs du commerce international des marchandises

Les tableaux 4.1 contiennent les résultats du calcul des indices de concentration et de diversification des pays, régions géographiques et groupements économiques. Cet indice de concentration a vocation à montrer comment les exportations et importations d'un pays ou groupe de pays sont concentrées sur quelques produits ou réparties de façon plus homogène sur une gamme de produits. L'indicateur de diversification indique si la structure par produits des exportations ou importations d'un pays ou groupe de pays diverge de la structure par produits observée au niveau du monde.

Les tableaux 4.2 fournissent les indices de volume des exportations et des importations complétant ainsi l'information en valeur disponible dans les tableaux 1.1 et 1.2, les indices de la valeur unitaire des exportations et importations et les indices de termes de l'échange et le pouvoir d'achat des exportations dérivés des indices de valeur unitaire, calculés au niveau des pays et régions géographiques (4.2.1) et des groupements économiques (4.2.2).

## NOTES GÉNÉRALES

Afin d'améliorer la couverture des données et spécialement pour les années récentes, la méthode suivante a été utilisée pour le calcul des valeurs unitaires :

- Un ensemble d'indices de prix moyens au niveau des groupes de la CTCI (révision 3, position à 3 chiffres) a été construit en utilisant les sources disponibles.

- Au niveau des pays individuels, les indices de la valeur unitaire ont été calculés en utilisant comme pondération les valeurs des exportations et des importations de l'année précédente disponibles dans la table 3.2.

Dans certains cas ces indices peuvent différer des estimations publiées dans les sources officielles, le but principal étant de fournir des estimations approximatives et comparables pour la plupart des pays en développement.

Le tableau 4.3 contient les données sur les droits de douane NPF moyens appliqués à l'importation des principales catégories de produits non agricoles et non pétroliers, par marchés individuels.

### CINQUIÈME PARTIE

#### Commerce international des services

Les tableaux 5.1.1, 5.1.2 et 5.1.3 présentent la valeur des exportations et des importations totales des services par pays, par régions géographiques, groupements économiques et groupements commerciaux. Les tableaux incluent les valeurs des exportations (crédits) et des importations (débits) des services qui proviennent des statistiques sur les transactions internationales de services, telles qu'elles sont présentées dans les Statistiques de la balance des paiements du FMI. Les services sont définis comme rendements économiques de produits intangibles qui peuvent être produits, transférés et consommés au même moment. Cependant, les services recouvrent un groupe large et hétérogène de produits et d'activités que l'on peut difficilement englober dans une définition. Parfois, la démarcation entre les services et les marchandises n'est pas aisée. Les services sont produits sur commande et ils ont généralement pour résultat un changement des conditions des consommateurs qui ont demandé les services. Pour que la production d'un service soit terminée, il doit être fourni au consommateur.

Les chiffres couvrent les 11 catégories principales de services conformément à la définition du Manuel de la balance des paiements du FMI (MBP5, 1993). Ces catégories comprennent : les transports; les voyages; les communications; le bâtiment et les travaux publics; les assurances; les services financiers; l'informatique et l'information; les redevances et droits de licence; les autres services aux entreprises; les services personnels, culturels et relatifs aux loisirs; et les services fournis ou reçus par les administrations publiques. De manière générale, les difficultés à mesurer statistiquement la valeur du commerce des services persistent et les données de la balance des paiements sur les services peuvent être inférieures à la valeur des transactions réelles. Les agrégats inclus dans le tableau 5.1 comprennent les valeurs manquantes, estimées par le secrétariat de la CNUCED, qui ne sont pas présentées séparément.

Le tableau 5.2 liste, parmi les économies en développement, les 20 plus gros exportateurs et importateurs pour chacun des 10 secteurs principaux du commerce des services, c'est-à-dire les transports; les voyages; les communications; le bâtiment et les travaux publics; l'informatique et l'information; les assurances; les services financiers; les redevances et droits de licence; autres services aux entreprises; et les services personnels, culturels et relatifs aux loisirs. Les services fournis ou reçus par les administrations publiques ne sont pas inclus.

Le tableau 5.3 fait apparaître les données sur les services liés au tourisme en présentant, par pays et pour les années récentes, les statistiques suivantes : valeur des dépenses totales des visiteurs, valeur des dépenses des visiteurs sans le coût du transport, nombre de nuitées des touristes et nombre d'arrivées des visiteurs. Tous les indicateurs se réfèrent aux visiteurs non résidents (visiteurs internationaux). Le visiteur international est un voyageur voyageant dans une économie - où il n'est pas résident - pour y rester moins de 12 mois et dont le but principal du voyage est d'exercer une activité

qui n'est pas rémunérée par une entité résidente dans l'économie visitée. Cela inclut des personnes qui arrivent sur le territoire d'une économie pour y rester moins d'une année pour affaires ou pour des raisons personnelles. Les touristes sont ceux qui séjournent dans le pays visité au moins une nuit dans un logement collectif ou privé. Les visiteurs d'une journée sont des personnes qui ne passent pas la nuit dans le pays visité.

Le tableau 5.4 concerne le transport maritime international. Il contient des données sur la flotte marchande mondiale par pavillons d'immatriculation et par types de navires et fait spécialement ressortir le groupe des principaux pays de libre immatriculation. Un propriétaire qui enregistre son navire dans un pays "libre d'immatriculation" ne doit avoir aucune relation avec ce pays. Le nombre de pays de libre immatriculation a changé au cours des années. Le groupe de "principaux pays de libre immatriculation" comprend désormais plus de pays (10 au total) que le même groupe paru dans les versions antérieures du Manuel. Le tableau 5.4 incorpore les informations consolidées provenant des différentes éditions de la publication Review of Maritime Transport. Elle rend compte de l'évolution mondiale du transport multimodal, portuaire et maritime concernant les principaux trafics de vrac liquides, de vrac secs et de conteneurs.

### SIXIÈME PARTIE

#### Produits de base

Le tableau 6.1 donne les indices annuels et trimestriels de prix en dollars courants sur le marché libre d'une sélection de produits de base exportés par les économies en développement. Ces indices sont aussi disponibles au niveau des groupes de produits de base suivants : produits alimentaires, boissons tropicales, huiles et graines oléagineuses, matières premières d'origine agricole, minéraux, minerais et métaux ainsi qu'un indice de l'ensemble. Les pondérations ont été calculées à partir de la valeur des exportations des pays en développement de 1999 à 2001 et les indices en utilisant 2000=100 comme année de base. Ce tableau a été établi à partir de données extraites de la base de données en ligne des statistiques de prix des produits de base accessible depuis le portail des statistiques du site web de la CNUCED.

Le tableau 6.2 complète l'information sur les prix des produits de base par les indices d'instabilité et les tendances de prix sur le marché libre d'une sélection de produits de base ayant une importance particulière pour les économies en développement.

Le tableau 6.3 présente la production d'aluminium et de cuivre à différents niveaux de transformation et leur consommation par pays et régions géographiques. Les chiffres de la production de bauxite sont exprimés en volume brut, alors que ceux de la production du minerai de cuivre sont indiqués en métal contenu.

### SEPTIÈME PARTIE

#### Finance internationale

Le tableau 7.1 contient un état récapitulatif du «compte courant» de la balance des paiements des pays et territoires individuels. Les données du compte des transactions courantes de la balance des paiements recouvrent toutes les transactions, entre entités résidentes et non résidentes, portant sur des valeurs économiques, concernant notamment les biens, les services, les revenus et les transferts courants. Ce tableau comprend les statistiques sur ces catégories principales, y compris le détail additionnel sur les revenus d'investissement direct étranger. Pour l'information sur les concepts concernant les catégories mentionnées, veuillez vous référer au Manuel de la balance des paiements du FMI (MBP5, 1993).

Le tableau 7.2 fait apparaître l'état récapitulatif du «compte de capital et d'opérations financières» de la balance des paiements des économies individuelles. Les chiffres des comptes de capital et des comptes financiers couvrent les transactions en avoirs et engagements étrangers. Les avoirs représentent des créances sur les non résidents et les engagements des dettes envers les non

résidents. Toutes les réévaluations et autres variations d'avoirs et d'engagements qui ne reflètent pas des transactions sont exclues du compte de capital et d'opérations financières. Le compte de capital est subdivisé en transferts de capital et en acquisitions et cession d'avoirs non financiers non-produits. Le compte financier recouvre les investissements (directs, de portefeuille et autres) et les avoirs de réserve (or monétaire, DTS, devises et autres créances). Ce tableau comprend les statistiques sur ces catégories principales du «compte de capital et d'opérations financières». Pour l'information sur les concepts concernant les catégories mentionnées, veuillez vous référer au Manuel de la balance des paiements du FMI (MBP5, 1993).

Les tableaux 7.3.1, 7.3.2 et 7.3.3 sont consacrés aux investissements directs en provenance de l'étranger (IDE). Ils présentent les flux entrants et sortants de l'IDE par pays et régions géographiques, groupements économiques et groupements commerciaux. Les chiffres correspondent aux données contenues dans l'Annexe statistique du World Investment Report 2006: FDI from Developing and Transition Economies: Implications for Development, de la CNUCED. L'investissement direct étranger (IDE) est un investissement impliquant une relation à long terme et témoignant de l'intérêt durable d'une entité résidant dans un pays (investisseur étranger direct ou société mère) à l'égard d'une entreprise résidant dans un autre pays (entreprise bénéficiaire, entreprise affiliée, ou encore filiale étrangère). Cet investissement englobe à la fois la transaction initiale entre les deux entités et toutes les transactions ultérieures entre elles et entre filiales étrangères, qu'elles soient constituées ou non en sociétés. L'entreprise d'investissement direct est définie comme une entreprise dotée ou non de la personnalité morale, dans laquelle un investisseur direct qui est résident d'une autre économie détient au moins 10% des actions ordinaires ou des droits de vote (ou l'équivalent).

Le tableau 7.4 fournit les informations sur les envois de fonds des travailleurs pour les principales économies en développement concernées. Ces données sont également communiquées en pourcentage du commerce international (total des exportations et importations). Selon la définition du Manuel de la balance des paiements du FMI (MBP5, 1993), les envois de fonds des travailleurs sont les transferts de biens ou d'actifs financiers effectués par les migrants qui vivent et travaillent (considérés résidents) dans une économie en faveur des résidents de leur ancien pays de résidence. Un migrant doit vivre et travailler dans une nouvelle économie durant plus d'une année pour y être considéré résident. Le MBP5 classe séparément les envois de fonds des travailleurs de la rémunération des salariés. Les valeurs du tableau 7.4 incluent la somme des deux catégories mentionnées, afin de mieux présenter les flux entrants dans ou sortants d'une économie à travers les transferts liés aux travailleurs migrants ou non résidents.

Le tableau 7.5 fait apparaître les données relatives aux réserves internationales (les réserves totales moins l'or) des économies en développement par pays, par régions et par groupements économiques. Les mois d'importation que ces réserves peuvent financer, dans la situation actuelle du commerce international du pays, sont également indiqués, ainsi que la variation annuelle des réserves totales. Selon la définition du FMI, les réserves totales moins l'or représentent la somme des avoirs du pays en devises, la position de ses réserves au FMI et la valeur en dollars E.U. des avoirs en DTS de ses autorités monétaires.

Les flux financiers publics vers les économies en développement sont retracés dans tableaux 7.6 par catégories de flux, pays, régions géographiques et groupements économiques. La définition des flux bilatéraux et multilatéraux est conforme aux publications du Comité d'aide au développement (CAD – OCDE).

Le tableau 7.7 contient des données sur la dette extérieure à long terme des principaux groupes d'économies en développement, en particulier la ventilation détaillée de la dette publique ou garantie par l'état par sources d'emprunt. Les données de la dette extérieure présentées dans ce tableau se basent sur le Système de notification des pays débiteurs (SNPD), géré par la Banque mondiale.

### HUITIÈME PARTIE

#### Indicateurs du développement

Les tableaux 8.1 fournissent le produit intérieur brut (PIB) nominal total et par habitant des pays, régions géographiques et groupements économiques. Les données de PIB en dollars ont été obtenues à partir des valeurs de PIB exprimées à l'origine en monnaies nationales. Les taux de change moyens annuels sur le marché libre, obtenus des séries statistiques du FMI, ont été utilisés pour la plupart des pays lors de la conversion en dollars.

Les taux annuels moyens de variation du PIB réel total et du PIB réel par habitant des pays, régions géographiques et groupements économiques sont disponibles dans les tableaux 8.2. Les taux de croissance se basent sur le PIB en dollars constants de l'année 1990.

Le PIB total est décomposé par catégories de dépenses et la valeur ajoutée totale par branches d'activité économique dans les tableaux 8.3, pour les pays, régions géographiques et groupements économiques.

Les tableaux 8.4 fournissent des données sur la population et la main-d'œuvre : population totale, population urbaine en pourcentage de la population totale, main-d'œuvre totale, main-d'œuvre féminine en pourcentage de la main-d'œuvre totale, main-d'œuvre dans l'agriculture, main-d'œuvre féminine en pourcentage de la main-d'œuvre totale dans l'agriculture.

Les données de base sur la population et la main-d'œuvre sont complétées par les indicateurs sur la démographie du tableau 8.5 : taux d'accroissement de la population, taux d'évolution naturelle par 1 000 habitants, taux net de migration par 1 000 habitants, taux de natalité et de mortalité bruts pour 1 000 habitants, taux de mortalité infantile pour 1 000 naissances vivantes, espérance de vie à la naissance.

### AUTRES NOTES

Sauf indication contraire, les agrégats de pays sont obtenus en sommant les données des pays composant le groupe. Les calculs d'agrégats peuvent dans certains cas inclure des données estimées par le secrétariat de la CNUCED qui ne sont pas nécessairement toutes rapportées séparément.

Par ailleurs, la somme des chiffres et des pourcentages indiqués dans les tableaux ne correspond pas nécessairement aux totaux en raison des arrondis.

Les données ont été collectées et vérifiées pour qu'elles correspondent à la couverture géographique des pays, telle qu'elle est décrite en début de Manuel. Toutefois certains écarts n'ont pu être évités en fonction de la disponibilité des données. Ils sont alors décrits dans les notes de fin de tableau.

Sauf indication contraire, le terme «dollar» s'entend du dollar des États-Unis d'Amérique et les données en dollars sont exprimées en dollars courants de l'année à laquelle elles se réfèrent.

Les taux moyens d'évolution annuelle sont définis par le coefficient b de la fonction exponentielle de tendance  $y = aebt$ , où t représente le temps. Cette méthode permet de prendre en compte toutes les observations concernant une période donnée sans que le taux de croissance obtenu ne soit trop affecté par des valeurs exceptionnelles.

### SIGNIFICATION DES SYMBOLES

- 0 Un zéro signifie que le montant est nul ou négligeable.
  - Un tiret signifie que la rubrique est sans objet.
  - .. Deux points signifient que les données ne sont pas disponibles ou ne sont pas communiquées séparément.
  - Le trait d'union entre deux millésimes (par exemple 1985-1990) indique qu'il s'agit de la période tout entière, y compris la première et la dernière année mentionnées.
  - (e) Estimation
  - (p) Donnée provisoire
  - (r) Donnée révisée
- Les exceptions sont indiquées dans les notes de bas de page.

Les pays et territoires sont présentés suivant des critères géographiques conformes à ceux de la Division de statistique, Département des affaires économiques et sociales (DAES) de l'ONU. Les pays et territoires sont aussi regroupés suivant des critères économiques ou d'adhésion à des accords commerciaux à des fins d'analyse statistique et de recherche.

Dans cette publication, le terme «économie» couvre les régions, les pays et les territoires.

Les pays sont montrés dans les tableaux s'ils ont communiqué des données ou si des estimations ont pu être calculées.

### 1. Régions géographiques, pays et territoires

Les pays et territoires sont répartis en trois grandes catégories, les économies en développement, les économies en transition et les économies développées, elles-mêmes subdivisées suivant des critères géographiques.

#### 1) Économies en développement :

Ces économies sont réparties entre quatre grandes régions géographiques : Amérique, Afrique, Asie et Océanie elles-mêmes subdivisées en sous-régions pour permettre la présentation de statistiques plus détaillées. Les exceptions à ce classement que l'on retrouve dans certains tableaux sont indiquées dans des notes.

#### 2) Économies en transition :

Ces économies sont réparties entre deux grandes régions géographiques : Asie et Europe.

#### 3) Économies développées :

Ces économies sont réparties entre quatre grandes régions géographiques : Amérique, Asie, Europe et Océanie.

### 2. Groupements économiques des économies en développement

Dans le *Manuel de statistiques de la CNUCED*, les regroupements des pays et territoires en développement sont nombreux et variés afin de disposer facilement des données statistiques nécessaires à l'analyse socio-économique et aux recherches sur le développement.

Les économies en développement sont présentées à trois niveaux d'agrégation : le groupe dans son intégralité, puis sans la Chine continentale et enfin sans les pays les moins avancés.

Les économies en développement sont également réparties en trois groupes de revenu en fonction du PIB par habitant en 2000 : revenu élevé, revenu intermédiaire et revenu faible. Cette répartition est basée sur les données de PIB et de population qui étaient disponibles en 2004 et elle n'a pas été révisée afin de maintenir la composition des groupes durant plusieurs éditions du *Manuel de statistiques*.

Le groupe des pays pauvres très endettés (PPT) inclut 40 pays. Ces pays bénéficient de l'initiative de désendettement de la Banque mondiale et du Fonds monétaire international.

Les pays les moins avancés (PMA) et les pays en développement sans littoral sont des groupes de pays qui requièrent une attention particulière de la communauté internationale. Les PMA sont présentés aux niveaux d'agrégation suivants : Afrique et Haïti, Asie et les îles.

Depuis 1994, les Nations Unies ont également pris en compte les problèmes particuliers des petits États insulaires en développement mais n'ont pas établi de liste officielle de ces États. La liste présentée dans le *Manuel de statistiques* est utilisée par la CNUCED à des fins analytiques uniquement.

Le groupement des principaux exportateurs de pétrole comprend les pays dont la part du pétrole et des produits pétroliers ne représentait pas moins de 50 % de leurs exportations totales, et les exportations de ces produits s'élevaient à au moins 2 milliards de dollars en 2003-2005 en moyenne. Les pays composant ce groupement sont répartis en trois zones géographiques : Afrique, Amérique et Asie.

Le groupement des principaux exportateurs d'articles manufacturés, répartis entre Amérique et Asie, comprend les économies dont la part d'articles manufacturés ne représentait pas moins de 50 % de leurs exportations totales, et leurs exportations d'articles manufacturés avaient une valeur moyenne d'au moins 22 milliards de dollars en 2003-2005.

La composition des groupements des économies émergentes (réparties entre Amérique et Asie) et des économies nouvellement industrialisées (première et deuxième génération) correspond à celle utilisée dans le *Rapport sur le commerce et le développement* de la CNUCED.

Les différentes régions géographiques sont également présentées à différents niveaux d'agrégation :

- *Afrique* : Afrique septentrionale sans le Soudan, Afrique subsaharienne, Soudan compris, avec et sans l'Afrique du Sud.

- *Amérique* : Amérique centrale et Grandes Antilles sans Porto Rico, avec et sans le Mexique, Amérique du Sud et centrale, Amérique du Sud sans le Brésil.

- *Asie* : Asie orientale et du Sud-Est sans la Chine et Asie méridionale sans l'Inde.

### 3. Groupements commerciaux et interrégionaux

Les statistiques des groupements commerciaux sont présentées dès lors qu'elles sont pertinentes et présentent un intérêt analytique. Ces groupements englobent toutes les économies concernées et sont classés selon les grandes régions géographiques utilisées précédemment, à l'exception des groupements interrégionaux suivants : le groupe des États d'Afrique, des Caraïbes et du Pacifique (ACP), le groupe de Coopération économique de l'Asie et du Pacifique (CEAP), le groupe de Coopération économique de la mer Noire (CEMN) et la Communauté des États indépendants (CEI).

## Product classification for international trade

The *Handbook of Statistics* refers to the Standard International Trade Classification (SITC) Revision 3 detailed below.

Depending on the table, nomenclature of statistics is detailed at the 3-digit level or by broad product group as follows:

SITC Codes Codes CTIC	Product groups
0 + 1 + 22 + 4	All food items
2 - (22 + 27 + 28)	Agricultural raw materials
27 + 28 + 68 + 667 + 971	Ores, metals, precious stones and non-monetary gold
3	Fuels
5 to 8 - (667 + 68)	Manufactured goods:
5	- Chemical products
7	- Machinery and transport equipment
6 + 8 - (667 + 68)	- Other manufactured goods

**Codes** Standard International Trade Classification (SITC) Revision 3 (1 to 3 digits)

## Classification des produits pour le commerce international

Le *Manuel de statistiques* se réfère à la Classification type pour le commerce international (CTCI) révision 3 qui est détaillée ci-dessous.

Les statistiques sont présentées, selon les tableaux, au niveau détaillé de la nomenclature (position à trois chiffres) ou par groupes de produits dont la composition est la suivante :

Groupes de produits
Produits alimentaires
Matières premières d'origine agricole
Minerais, métaux, pierres précieuses et or à usage non monétaire
Combustibles
Articles manufacturés :
- Produits chimiques
- Machines et matériel de transport
- Articles manufacturés divers

**Classification type pour le commerce international (CTCI) révision 3 (positions de un à trois chiffres)**

0	Food and live animals	Produits alimentaires et animaux vivants
<b>00</b>	<b>Live animals other than animals of division 03</b>	<b>Animaux vivants autres que ceux figurant dans la division 03</b>
001	Live animals other than animals of division 03	Animaux vivants autres que ceux figurant dans la division 03

035	Fish, dried, salted or in brine; smoked fish	Poissons séchés, salés, fumés
036	Crustaceans, molluscs and aquatic invertebrates	Crustacés, mollusques et invertébrés aquatiques
037	Fish, aqua. invertebrates, prepared, preserved, n.e.s.	Poissons, crustacés, mollusques, préparés ou conservés, n.d.a.
<b>04</b>	<b>Cereals and cereal preparations</b>	<b>Céréales et préparations à base de céréales</b>
041	Wheat (including spelt) and meslin, unmilled	Froment (dont épeautre) et méteil non moulus
042	Rice	Riz
043	Barley, unmilled	Orge non mondée
044	Maize (not including sweet corn), unmilled	Maïs non moulu
045	Cereals, unmilled (excluding wheat, rice, barley, maize)	Céréales non moulues (sauf froment, riz, orge, maïs)
046	Meal and flour of wheat and flour of meslin	Semoules
047	Other cereal meals and flour	Autres semoules et farines de céréales
048	Cereal preparations, flour of fruits or vegetables	Préparations; céréales, féculs de fruit ou légume
<b>05</b>	<b>Vegetables and fruits</b>	<b>Légumes et fruits</b>
054	Vegetables, fresh, chilled, frozen or simply preserved; roots tubers and other edible vegetable products, n.e.s. fresh, dried	Légumes et plantes potagères, frais, réfrigérés, congelés ou simplement conservés; autres produits végétaux, n.d.a. frais, séchés
056	Vegetables, roots, tubers, prepared, preserved, n.e.s.	Préparations ou conserves de légumes, n.d.a.
057	Fruits and nuts (excluding oil nuts), fresh or dried	Fruits (sauf oléagineux), frais ou secs
058	Fruit, preserved, and fruit preparations (no juice)	Préparations et conserves de fruits (sauf jus)
059	Fruit and vegetable juices, unfermented, no spirit	Jus de fruits, non fermentés, sans alcool
<b>06</b>	<b>Sugars, sugar preparations and honey</b>	<b>Sucres, préparations à base de sucre, et miel</b>
061	Sugars, molasses and honey	Sucres, mélasses et miel
062	Sugar confectionery	Sucrieries
<b>07</b>	<b>Coffee, tea, cocoa, spices, and manufactures thereof</b>	<b>Café, thé, cacao, épices, et produits dérivés</b>
071	Coffee and coffee substitutes	Café et succédanés du café
072	Cocoa	Cacao

Product classification for international trade		Classification des produits pour le commerce international	
073	Chocolate, food preparations with cocoa, n.e.s.		Chocolat et autres préparations du cacao, n.d.a.
074	Tea and mate		Thé et maté
075	Spices		Épices
<b>08</b>	<b>Feeding stuff for animals (excluding unmilled cereals)</b>		<b>Nourriture destinée aux animaux (sauf céréales non moulues)</b>
081	Feeding stuff for animals (excluding unmilled cereals)		Nourriture destinée aux animaux (sauf céréales non moulues)
<b>09</b>	<b>Miscellaneous edible products and preparations</b>		<b>Produits et préparations alimentaires divers</b>
091	Margarine and shortening		Margarine et graisses culinaires
098	Edible products and preparations, n.e.s.		Produits et préparations alimentaires, n.d.a.
<b>1</b>	<b>Beverages and tobacco</b>		<b>Boissons et tabacs</b>
<b>11</b>	<b>Beverages</b>		<b>Boissons</b>

112	Alcoholic beverages		Boissons alcooliques
<b>12</b>	<b>Tobacco and tobacco manufactures</b>		<b>Tabacs bruts et fabriqués</b>
121	Tobacco, unmanufactured; tobacco refuse		Tabacs bruts ou non fabriqués; déchets de tabac
122	Tobacco, manufactured		Tabacs fabriqués (dont succédanés de tabac)
<b>2</b>	<b>Crude materials, inedible, except fuels</b>		<b>Matières brutes non comestibles, sauf carburants</b>
<b>21</b>	<b>Hides, skins and furskins, raw</b>		<b>Cuir, peaux et pelleteries, bruts</b>
211	Hides and skins (except furskins), raw		Cuir et peaux (sauf pelleteries), bruts
212	Furskins, raw, other than hides and skins of group 211		Pelleteries brutes autres que ceux du groupe 211
<b>22</b>	<b>Oil seeds and oleaginous fruits</b>		<b>Graines et fruits oléagineux</b>
222	Oil seeds & oleaginous fruits (excl. flour) of a kind used for the extraction of soft' oils		Graines et fruits oléagineux (sauf farines) servant normalement à l'extraction d'autres huiles végétales fixes douces
223	Oil seeds & oleaginous fruits (incl. flour, n.e.s.) of a kind used for the extraction of other fixed vegetable oils		Graines et fruits oléagineux (y compris les farines) servant normalement à l'extraction d'autres huiles végétales fixes
<b>23</b>	<b>Crude rubber (including synthetic and reclaimed)</b>		<b>Caoutchouc brut (y compris synthétique et régénéré)</b>
231	Natural rubber and similar gums, in primary forms		Caoutchouc naturel, balata, guayule, etc., formes primaires.
232	Synthetic rubber; reclaimed rubber; waste and scrap		Caoutchouc synthétique; caoutchouc régénéré; déchets et débris
<b>24</b>	<b>Cork and wood</b>		<b>Liège et bois</b>
244	Cork, natural, raw and waste (incl. blocks, sheets)		Liège naturel brut et déchets (dont blocs, feuilles)
245	Fuel wood (excluding wood waste) and wood charcoal		Bois de chauffage (sauf déchets), charbon de bois
246	Wood in chips or particles and wood waste		Bois en plaquettes, particules, déchets de bois
247	Wood in the rough or roughly squared		Bois bruts ou équarris
248	Wood, simply worked, and railway sleepers of wood		Bois simplement travaillés, traverses de bois pour voies ferrées
<b>25</b>	<b>Pulp and waste paper</b>		<b>Pâtes à papier et déchets de papier</b>
251	Pulp and waste paper		Pâtes à papier et déchets de papier
<b>26</b>	<b>Textiles fibres and their wastes</b>		<b>Fibres textiles et leurs déchets</b>
261	Silk		Soie
263	Cotton		Coton
264	Jute and other textile bast fibre, n.e.s., not spun; tow, waste		Jute et autres fibres textiles libériennes, n.d.a.; déchets
265	Vegetable textile fibres, not spun; waste of them		Fibres textiles végétales (sauf coton, jute); déchets
266	Synthetic fibres suitable for spinning		Fibres synthétiques discontinues, pour filature
267	Other man-made fibres suitable for spinning and waste		Autres fibres synthétiques ou artificielles pouvant être filées; déchets
268	Wool and other animal hair (including wool tops)		Laines et autres poils (dont rubans de laine)
269	Worn clothing and other worn textile articles, rags		Friperie, drilles et chiffons
<b>27</b>	<b>Crude fertilizers (excluding div. 56) &amp; crude minerals</b>		<b>Engrais bruts saufs ceux de la division 56, et minéraux bruts</b>
272	Crude fertilizers (excluding those of division 56)		Engrais bruts (sauf ceux de la division 56)
273	Stone, sand and gravel		Pierres, sables et graviers
274	Sulphur and unroasted iron pyrites		Soufre et pyrite de fer non grillées
277	Natural abrasives, n.e.s. (including industrial diamonds)		Abrasifs naturels, n.d.a. (dont diamants industriels)
278	Other crude minerals		Autre minéraux bruts
<b>28</b>	<b>Metalliferous ores and metal scrap</b>		<b>Minerais métallifères et déchets de métaux</b>
281	Iron ore and concentrates		Minerais de fer et leurs concentrés
282	Ferrous waste and scrap; remelting ingots, iron, steel		Déchets et débris de fer, fonte, acier; lingots
283	Copper ores & concentrates; copper mattes, cement copper		Minerais de cuivre et concentrés; mattes de cuivre; cuivre de ciment
284	Nickel ores and concentrates; nickel mattes, etc.		Minerais de nickel et concentrés; mattes, etc.
285	Aluminium ores and concentrates (including alumina)		Minerais d'aluminium et concentrés (dont alumine)
286	Ores and concentrates of uranium or thorium		Minerais d'uranium ou de thorium et concentrés
287	Ores and concentrates of base metals, n.e.s.		Minerais de métaux communs et concentrés, n.d.a.

- 728 Other machinery for particular industries, n.e.s.

**73 Metal working machinery**

- 731 Machine-tools working by removing material
- 733 Machine.-tools for working metal (exclud.removing material)
- 735 Parts, n.e.s., & accessories for machines of 731, 733
- 737 Metalworking machinery (excluding machine tools) & parts

**74 Other industrial machinery and parts**

- 741 Heating & cooling equipment & parts thereof, n.e.s.
- 742 Pumps for liquids; liquid elevators; parts for such pumps
- 743 Pumps (excluding liquid), air & gas compressors & fans; centrifuges
- 744 Mechanical handling equipment, & parts, n.e.s.

**Fer et acier**

- Fonte, fer spongieux, poudres de fer et d'acier
- Lingots et autres formes primaires en fer ou acier;
- Produits laminés plats, en fer ou aciers non alliés
- Produits laminés plats, fer, aciers non alliés, zingués
- Produits laminés plats, en aciers alliés
- Barres, profilés en fer ou acier (dont palplanches)
- Rails et autres éléments de voies ferrées, fer, acier
- Fils de fer ou d'acier
- Tubes, profilés creux et accessoires, fer ou acier

**Métaux non ferreux**

- Argent, platine et métaux de la mine du platine
- Cuivre
- Nickel
- Aluminium
- Plomb
- Zinc
- Étain
- Autres métaux communs non ferreux utilisés en métallurgie

**Articles manufacturés en métal, n.d.a.**

- Constructions et parties, n.d.a. en fonte, fer, acier
- Réceptacles métalliques pour stockage ou transport
- Ouvrages en fils métalliques (sauf électriques), grillages
- Pointes, vis, écrous, boulons, clous et similaires
- Outils à main et outils pour machines
- Coutellerie
- Articles d'économie domestique en métaux communs, n.d.a.
- Articles manufacturés en métaux communs, n.d.a.

**Machines et matériel de transport****Machines génératrices, moteurs et leur équipement**

- Chaudières à vapeur, auxiliaires, parties et pièces
- Turbines à vapeur, parties, pièces détachées, n.d.a.
- Moteurs à explosion ou à combustion interne, n.d.a.
- Moteurs et machines motrices, non électrique, n.d.a.
- Appareils électriques rotatifs, pièces détachées, n.d.a.
- Moteurs et machines motrices, pièces, parties, n.d.a.

**Machines et appareils spécialisés pour les industries particulières**

- Machines agricoles (sauf tracteurs), parties, pièces
- Tracteurs (sauf 74414 et 74415)
- Appareils, matériel de génie civil et construction
- Machines pour industrie textile, cuir et peaux, n.d.a.
- Machines pour pâte à papier et papier; parties, pièces
- Machines pour imprimerie, brochage, reliure; parties
- Machines pour industrie alimentaire
- Autres machines pour industries particulières, n.d.a.

**Machines et appareils pour le travail des métaux**

- Machines-outils travaillant par enlèvement de matière
- Machines pour travail des métaux (sans enlèvement)
- Pièces, n.d.a., des machines des groupes 731 et 733
- Machines pour travail des métaux, n.d.a.; pièces détachées

**Autres machines industrielles et pièces détachées**

- Appareils de chauffage et de réfrigération, n.d.a.
- Pompes pour liquides; élévateurs à liquides; parties et pièces
- Pompes (sauf pour liquides), compresseurs; ventilateurs; centrifugeuses
- Équipement mécanique de manutention, pièces, n.d.a.

Notes :

\* Pays qui utilisent le système du commerce spécial en tant que système d'enregistrement.

(a) Donnée relative à l'Union Douanière d'Afrique du Sud (Afrique du Sud, Botswana, Lesotho, Namibie et Swaziland)

(b) Y compris Aruba

(1) Non-compris le commerce avec les autres pays membres de la CEMAC.

(2) Avant 1986 compris dans Antilles néerlandaises. Les données comprennent les exportations et importations de pétrole brut et produits dérivés.

(3) À partir de 1990, certains produits pétroliers et chimiques ne sont plus inclus dans les statistiques du commerce.

(4) Avant 1986, y compris Aruba.

(5) Non-compris les biens d'importation financés par l'aide à l'étranger.

(6) Non-compris les biens à usage militaire, le matériel fissile, le combustible de soude et l'avitaillement des navires et aéronefs.

(7) Y compris le commerce entre les États de la Malaisie. À partir de 1965, non comprises les importations militaires et l'installation près des côtes de l'industrie pétrolière.

(8) Y compris les transbordements vers et en provenance de la Malaisie péninsulaire.

(9) Non-compris les biens à usage militaire, les métaux précieux et les biens fournis dans les ports étrangers.

(10) Avant 1994, concerne seulement le commerce avec les pays extérieurs à la CEI.

(11) Avant 1998, les données se réfèrent uniquement à la Fédération de la Bosnie-Herzégovine. L'autre entité de la Bosnie-Herzégovine, Republika Srpska, n'est pas incluse.

(12) Avant 1994, non-compris le commerce avec les républiques indépendantes de l'ancienne URSS.

(13) À partir de 1985, les chiffres ne sont pas comparables à ceux des années antérieures à cause des révisions du taux de change de la couronne par rapport au dollar des États-Unis.

(14) À partir de 1995, y compris les biens destinés à subir des transformations.

(15) Avant 1988, non-compris les navires.

(16) Avant 1996, non-compris les zones franches douanières.

- Data in this table are based on trade figures in table 1.1.1.

Notes:

\* Countries which use the Special Trade System as reporting system.

(a) Data refers to South Africa Customs Union (Botswana, Lesotho, Namibia, South Africa and Swaziland)

(b) Including Aruba

(1) Trade with other member countries of CEMAC is excluded.

(2) Prior to 1986, included in Netherlands Antilles. Including exports and imports of crude oil and oil products.

(3) From 1990 onwards, trade statistics exclude certain oil and chemical products.

(4) Prior to 1986, including Aruba.

(5) Excluding imports of goods financed through foreign aid.

(6) Excluding military goods, fissionable materials, bunkers, ships and aircraft.

(7) Inter-trade between the States of Malaysia included. From 1965 onwards, excluding military imports and offshore installations of petroleum industry.

(8) Including trans-shipments to and from peninsular Malaysia.

(9) Excluding military goods, precious metals and goods procured in foreign ports.

(10) Prior to 1994, covers only trade with countries outside the CIS.

(11) Prior to 1998, data refer to the Federation of Bosnia and Herzegovina only. The other entity of Bosnia and Herzegovina, Republika Srpska, is not included.

(12) Prior to 1994, excluding trade with independent states resulting from the former USSR.

(13) From 1985 onwards, data are not comparable to those shown for prior periods due to revisions of the koruna-to-US dollar exchange rate.

(14) From 1995 onward, including goods for processing.

(15) Prior to 1988, excluding ships.

(16) Prior to 1996, excluding customs free zones.

- Les données dans ce tableau ont été calculées d'après les chiffres du tableau 1.1.1.

Notes :

\* Pays qui utilisent le système du commerce spécial en tant que système d'enregistrement.

(a) Donnée relative à l'Union Douanière d'Afrique du Sud (Afrique du Sud, Botswana, Lesotho, Namibie et Swaziland)

(b) Y compris Aruba

(1) Non-compris le commerce avec les autres pays membres de la CEMAC.

(2) Avant 1986 compris dans Antilles néerlandaises. Les données comprennent les exportations et importations de pétrole brut et produits dérivés.

(3) À partir de 1990, certains produits pétroliers et chimiques ne sont plus inclus dans les statistiques du commerce.

(4) Avant 1986, y compris Aruba.

(5) Non-compris les biens d'importation financés par l'aide à l'étranger.

(6) Non-compris les biens à usage militaire, le matériel fissile, le combustible de soute et l'avitaillement des navires et aéronefs.

(7) Y compris le commerce entre les États de la Malaisie. À partir de 1965, non comprises les importations militaires et l'installation près des côtes de l'industrie pétrolière.

(8) Y compris les transbordements vers et en provenance de la Malaisie péninsulaire.

(9) Non-compris les biens à usage militaire, les métaux précieux et les biens fournis dans les ports étrangers.

(10) Avant 1994, concerne seulement le commerce avec les pays extérieurs à la CEI.

(11) Avant 1998, les données se réfèrent uniquement à la Fédération de la Bosnie-Herzégovine. L'autre entité de la Bosnie-Herzégovine, Republika Srpska, n'est pas incluse.

(12) Avant 1994, non-compris le commerce avec les républiques indépendantes de l'ancienne URSS.

(13) À partir de 1985, les chiffres ne sont pas comparables à ceux des années antérieures à cause des révisions du taux de change de la couronne par rapport au dollar des États-Unis.

(14) À partir de 1995, y compris les biens destinés à subir des transformations.

(15) Avant 1988, non-compris les navires.

(16) Avant 1996, non-compris les zones franches douanières.

- (1) Include unspecified destinations.  
(2) Exports data include a considerable amount of re-exports.  
(3) Estimate. Data are derived by calculating the difference between DOT's aggregate for Asia and the sum of countries classified in Asia by the data source.

- (1) Y compris des destinations non-spécifiées.  
(2) Les données des exportations comprennent une part importante de re-exportations.  
(3) Estimation. Les données sont dérivées par différence entre l'agrégat Asie fourni par DOT et la somme des pays classifiés en Asie dans la source.

Notes:

- (1) The symbol \*\* indicates the grouping to which the country belongs and the percentage share shown applies. The percentage is the share of exports of each commodity shown by the country in the relevant grouping total exports for that commodity (i.e. "developed", which refers to developed economies; "developing", which refers to developing economies; or "Economies in transition", which refers to economies in transition).

Notes :

- (1) Le symbole \*\* indique le groupement auquel le pays appartient et par rapport auquel est calculé le pourcentage. Ce pourcentage est la part que représentent les exportations du produit par le pays par rapport aux exportations du même produit par le groupement auquel le pays appartient («developed» se réfère aux économies développées, «developing» aux économies en développement et " Economies in transition " aux économies en transition).

### 3.3 Concentration and structural change indices of product markets Imports

Sources:  
- Data and UNCTAD secretariat estimates based on UN DESA Comtrade and IMF Direction of Trade statistics databases

Notes:

- (1) Concentration index:  
The Herfindahl-Hirschmann index is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

where

$H_i$  = value of concentration index for product i

$x_{ij}$  = value of exports or imports for country j and product i

$$X_i = \sum_{j=1}^n x_{ij} \text{ and}$$

n = maximum number of individual economies over the period from 1995 to 2006.

An index value that is close to 1 indicates a very concentrated market. On the contrary, values closer to 0 reflect a more equal distribution of market shares among exporters or importers.

- (2) Structural change index:  
This index, ranging from 0 to 1 reveals the structural change in trade for a particular product as compared to the reference year (1995 = 0).

An index value close to 1 indicates a significant change in the composition of exporters (importers). On the contrary, values closer to 0 would demonstrate a higher degree of "traditionality" in the markets over the period concerned.

The value is calculated as follows:

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

where

$I_i$  = Value of structure index for product i

$S_{ij}^0$  = Share of trade of product i for country j in 1995

$S_{ij}^1$  = Share of trade of product i for the country j in the concerned year

### 3.3 Indices de concentration et de changement structurel des marchés de produits Importations

Sources :  
- Données et estimations du secrétariat de la CNUCED sur la base de données Comtrade de ONU DAES et Direction of Trade statistics du Fonds Monétaire international

Notes :

- (1) Indice de concentration :  
L'indice Herfindahl-Hirschmann mesure le degré de concentration des marchés. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante:

$$H_i = \frac{\sqrt{\sum_{j=1}^n \left(\frac{x_{ij}}{X_i}\right)^2} - \sqrt{\frac{1}{n}}}{1 - \sqrt{\frac{1}{n}}}$$

où

$H_i$  = Valeur de l'indice de concentration pour le produit i

$x_{ij}$  = Valeur des exportations ou des importations du pays j pour le produit i

$$X_i = \sum_{j=1}^n x_{ij} \text{ et}$$

n = nombre maximum d'économies individuelles sur la période allant de 1995 à 2006.

Un indice proche de 1 indique une concentration très forte du marché pour ce produit en particulier. En revanche, une valeur proche de 0 démontre une répartition plus homogène du commerce entre les exportateurs ou les importateurs.

- (2) Indice de changement structurel :  
Cet indice, dont la valeur est comprise entre 0 et 1, représente les changements de structure du commerce par rapport à une année de référence (1995 = 0).

Une valeur proche de 1 indique un important changement structurel du commerce de ce produit, c'est à dire, une grande variation des parts de marché au sein des exportateurs ou importateurs, par rapport à l'année de référence. Plus la valeur de l'indice est proche de 0, plus la structure du commerce de ce produit est stable.

Il est calculé comme suit :

$$I_i = \frac{\sum_{j=1}^n |S_{ij}^1 - S_{ij}^0|}{2}$$

où

$I_i$  = Valeur de l'indice de changement structurel, pour le produit i

$S_{ij}^0$  = Part du commerce du produit i pour le pays j par rapport au commerce total de ce produit pour l'année 1995

$S_{ij}^1$  = Part du commerce du produit i pour le pays j, par rapport au commerce total de ce produit pour l'année concernée

- Data and UNCTAD secretariat estimates based on UN DESA Comtrade and IMF Direction of Trade statistics databases

Notes:

- (1) Number of products (at SITC, Revision 3, 3-digit group level) exported or imported by country or country grouping: this figure includes only those products that are greater than 100,000 dollars or more than 0.3 per cent of the country's or country group's total exports or imports.
- (2) Diversification index that ranges from 0 to 1, reveals the extent of the differences between the structure of trade of the country or country group and the world average. The index value closer to 1 indicates a bigger difference from the world average.

Diversification index is computed by measuring absolute deviation of the country share from world structure, as follows:

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

where  $h_j$  = share of product  $i$  in total exports or imports of country or country group  $j$   
 $h_i$  = share of product  $i$  in total world exports or imports.

This index is a modified Finger-Kreinin measure of similarity in trade. For more information, please consult the article of Finger, J. M. and M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses" in the *Economic Journal*, 89: 905-12.

- (3) The Herfindahl-Hirschmann index is a measure of the degree of market concentration. It has been normalized to obtain values ranking from 0 to 1 (maximum concentration), according to the following formula:

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left(\frac{x_i}{X}\right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

where  $H_j$  = country or country group index  
 $x_i$  = value of exports of product  $i$

$$X = \sum_{i=1}^n x_i$$

and  $n$  = number of products (at SITC Revision 3, 3-digit group level).

Notes :

- Nombre de produits (au niveau de la CTCl révision 3, position à 3 chiffres) exportés ou importés par chaque pays ou groupes de pays; cependant, seuls les produits ayant une valeur supérieure à 100 000 dollars ou comptant pour plus de 0,3 pour cent des exportations ou des importations totales du pays ou groupe de pays sont inclus.
- L'indice de diversification, dont la valeur est comprise entre 0 et 1, indique si la structure par produits des exportations d'un pays ou groupe de pays diverge peu ou beaucoup de la structure par produits des exportations totales dans le monde. Plus l'indice est proche de 1, plus la divergence est forte.

L'indice de diversification mesure la déviation absolue de la structure du pays par rapport à la structure mondiale comme ci-dessous :

$$S_j = \frac{\sum_i |h_{ij} - h_i|}{2}$$

où  $h_j$  = part du produit  $i$  dans le total des exportations (ou importations) du pays  $j$   
 $h_i$  = part du produit  $i$  dans le total des exportations (ou importations) mondiales.

Cet indice est une variante de l'indicateur de Finger-Kreinin sur la similarité de la structure du commerce. Pour plus d'information, veuillez consulter l'article de Finger, J. M. et M. E. Kreinin (1979), "A measure of 'export similarity' and its possible uses", dans *Economic Journal*, 89: 905-12.

- L'indice Herfindahl-Hirschmann mesure le degré de concentration des marchés. Il a été normalisé afin d'obtenir des valeurs comprises entre 0 et 1 (concentration maximale), d'après la formule suivante:

$$H_j = \frac{\sqrt{\sum_{i=1}^n \left(\frac{x_i}{X}\right)^2} - \sqrt{1/n}}{1 - \sqrt{1/n}}$$

où  $H_j$  = indice du pays  
 $x_i$  = valeur des exportations du produit  $i$

$$X = \sum_{i=1}^n x_i$$

et  $n$  = nombre de groupes de produits (de la CTCl révision 3, position à 3 chiffres).

Notes:

- (a) Data refers to South Africa Customs Union (Botswana, Lesotho, Namibia, South Africa and Swaziland)
- (1) Product categories are defined in terms of SITC Revision 2, and all corresponding Harmonized System (HS) 6-digit codes have been aggregated for each category.
- (2) Simple average for each product group calculated from simple average at HS 6-digit level.
- (3) Weighted average for each product group calculated from simple average at HS 6-digit level. Country's own imports at HS 6-digit level for corresponding years are used as weights. Where imports are not reported, mirror imports have been compiled using exports of partner countries.
- (4) From 2004 onwards, member of the European Union.
- (5) For the union, data refer to the composition of the group during that year. Excluding Bulgaria and Romania.

Notes :

- (a) Donnée relative à l'Union Douanière d'Afrique du Sud (Afrique du Sud, Botswana, Lesotho, Namibie et Swaziland)
- (1) Les catégories de produits sont définies sur la base de la CTCL, révision 2, et pour chaque catégorie, les codes à 6 chiffres du Système harmonisé (SH) correspondants ont été agrégés.
- (2) Moyenne arithmétique, pour chaque catégorie de produits, calculée à partir des moyennes arithmétiques au niveau du code à 6 chiffres du SH.
- (3) Moyenne arithmétique pondérée, pour chaque catégorie de produits, calculée à partir des moyennes simples au niveau du code à 6 chiffres du SH. Pour chaque année, les coefficients de pondération sont les importations de chaque marché au niveau du code à 6 chiffres du SH. Lorsque les importations n'étaient pas disponibles, elles ont été évaluées par les données miroir basées sur les exportations des pays partenaires.
- (4) À partir de 2004, membre de l'Union européenne.
- (5) Pour une année donnée, les tarifs de l'union se réfèrent à la composition du groupe durant cette année. Non-compris la Bulgarie et la Roumanie.

Notes :

- (1) Les données de l'année 2007 sont provisoires.
- (2) Année 1990 : la rupture de série est due aux chiffres reportés par l'ex RSF de Yougoslavie et les pays qui lui ont succédé, ainsi que à l'inclusion des données de la Fédération de Russie, tandis que les statistiques de l'ancienne URSS ne sont pas disponibles.
- (3) Années 2004 et 2005 : rupture de série.
- (4) Année 2004 : rupture de série.
- (5) Année 2006 : rupture de série.

## Notes:

**Arrivals of visitors** represent the total number of non-resident visitors who arrived in a reporting economy during a given year. A visitor can remain in an economy for a short time and not spend a night there, in which case he is not considered a tourist. A tourist is a person who stays for at least one night. All tourists are also visitors. When the same person visits a country several times in a year, the total number of arrivals is counted. Similarly, when a person travels to several countries during one trip, her/his arrival in each country is recorded separately. Countries differ in the way in which they count arrivals. Most take into account all arrivals of non-resident visitors at national borders, while others count arrivals at hotels and other types of tourist accommodation. The different approaches are marked by footnotes.

**Tourists' overnight stays** refer to the number of nights spent by non-resident tourists in a reporting country and concern all types of tourism accommodation.

**Total expenditure of visitors** corresponds to the sum of items "Travel receipts" and "Passenger transport" in IMF balance-of-payments data. It refers to expenditures of non-resident visitors within the territory of a reporting economy, including the costs they pay for transportation.

**Expenditure excluding transport** corresponds to the item "Travel receipts" in IMF balance-of-payments data. It refers to expenditures of non-resident visitors within the territory of a reporting economy. Transport expenditures are not included.

 (c) Arrivals of non-resident tourists in hotels and similar establishments  
 (d) Arrivals of non-resident visitors at national borders
- (1) Arrivals - Data until 1994 (inclusive) concern only arrivals at hotels and similar establishments, while later figures cover arrivals at national borders.  
 (2) Arrivals - Year 2000: break in series owing to new accommodation coverage.  
 (3) Data for the overnight stays refer to the metropolitan France only.  
 (4) Arrivals - Data until 1994 (inclusive) concern only arrivals of tourists at national borders, while later figures cover arrivals of visitors at national borders.  
 (5) Data for the overnight stays of tourists include only Bonaire and Curaçao, while figures referring to visitors' arrivals cover all of the Netherlands Antilles.  
 (6) Arrivals - Data until 1994 (inclusive) concern arrivals at national borders, while later figures cover only arrivals at hotels and similar establishments. Data for overnight stays cover Switzerland only; Liechtenstein is not included.

## Notes :

Les **Arrivées des visiteurs** représentent le nombre total de visiteurs qui sont arrivés dans l'économie déclarante durant une année. Le visiteur peut rester dans une économie brièvement et ne pas y passer la nuit ; dans ce cas, il n'est pas considéré comme touriste. Le touriste passe au moins une nuit dans le pays. Tous les touristes sont aussi des visiteurs. Quand une personne se rend dans un pays plusieurs fois par année, chaque visite est comptée séparément. De même, si quelqu'un se rend dans plusieurs pays durant un voyage, son arrivée dans chaque pays est prise en compte. Les pays comptent les arrivées des visiteurs de manières différentes: la plupart des pays prennent en compte toutes les arrivées aux frontières nationales, tandis que les autres comptent les arrivées dans des hôtels et autres types de logements touristiques. Les approches différentes sont identifiées par des notes de bas de page.

Les **Nuitées des touristes** se réfèrent au nombre de nuits que les touristes non-résidents ont passées dans le pays déclarant et concernent tout type d'établissement touristique.

Les **Dépenses totales des visiteurs** correspondent à la somme des rubriques "Revenus des voyages" et "Transport des passagers" de la balance des paiements du FMI. Les dépenses totales des visiteurs se réfèrent aux dépenses des visiteurs non-résidents sur le territoire de l'économie déclarante, y compris les dépenses pour le transport.

Les **Dépenses sans transport** correspondent à la rubrique "Revenus des voyages" de la balance des paiements du FMI. Elles se réfèrent aux dépenses des visiteurs non-résidents sur le territoire de l'économie déclarante. Les dépenses pour le transport n'y sont pas incluses.

 (d) Arrivées de visiteurs non-résidents aux frontières nationales
- (1) Arrivées - Les données jusqu'à l'année 1994 (incluse) concernent seulement les arrivées aux hôtels, tandis que les chiffres des années d'après couvrent les arrivées aux frontières nationales.  
 (2) Arrivées - Année 2000 : rupture de série, suite à une différente classification de logements.  
 (3) Les données sur les nuitées des touristes se réfèrent seulement à la France métropolitaine.  
 (4) Arrivées - Les données jusqu'à l'année 1994 (incluse) concernent seulement les arrivées des touristes, tandis que les chiffres des années d'après couvrent les arrivées des visiteurs.  
 (5) Les données sur la durée moyenne de séjour et sur les nuitées des touristes comprennent Bonaire et Curaçao seulement, tandis que les chiffres concernant les arrivées des visiteurs couvrent la totalité des Antilles Néerlandaises.  
 (6) Arrivées - Les données jusqu'à l'année 1994 (incluse) concernent les arrivées aux frontières nationales, tandis que les chiffres des années d'après couvrent seulement les arrivées aux hôtels et autres types d'accommodation similaires. Les données sur les nuitées des touristes se réfèrent à la Suisse et ne couvrent pas le Liechtenstein.

### Notes:

- (a) Including San Marino.  
(b) Including United States Virgin Islands.  
(c) Including Taiwan Province of China.  
(1) Weight measure of a vessel's carrying capacity. It includes cargo, fuel and stores.  
(2) From 2002 onwards, ships registered under the flag of the Marshall Islands (developing country) are shown separately; before they were included with the United States of America (developed country).  
(3) Open-registry or international-registry country: A ship owner who registers his or her vessel in an open-registry or international-registry country does not need to have any connection with a country of registry. The number of open-registry countries has varied over the years. The following 10 economies appear in the group for this table: Antigua and Barbuda, Bahamas, Bermuda, Cyprus, Isle of Man, Liberia, Malta, Marshall Islands, Panama, and Saint Vincent and Grenadines.  
The data for this group are not comparable with those presented in earlier editions, as the coverage of the group has changed and it now includes four more countries. Data for the period 2002-2007 cover also the fleet of the Isle of Man, included otherwise with figures for the United Kingdom and not shown separately.

### Notes :

- (a) Y compris Saint-Marin.  
(b) Y compris les îles Vierges américaines.  
(c) Y compris la Province chinoise de Taiwan.  
(1) Mesure de poids de la capacité de charge d'un navire. Inclut la cargaison, le carburant et les magasins.  
(2) Les navires immatriculés en Îles Marshall (pays en développement) sont présentés séparément à partir de 2002 ; avant, ils étaient compris dans les chiffres des États-Unis (pays développé).  
(3) Pays de libre immatriculation ou de registre international : Un propriétaire qui enregistre son navire dans un pays "de libre immatriculation ou de registre international" ne doit avoir aucune relation avec ce pays. Le nombre de pays "libres d'immatriculation" a changé au cours des années. Les 10 pays suivants font partie du groupe dans ce tableau : Antigua-et-Barbuda, Bahamas, Bermudes, Chypre, Îles Marshall, Île de Man, Libéria, Malte, Panama et Saint-Vincent-et-les Grenadines.  
Les données de ce groupe ne sont pas comparables à celles présentées dans les éditions précédentes parce que le groupe comprend maintenant quatre économies de plus. Les données pour la période 2002-2007 comprennent aussi la flotte de l'île de Man, qui est comptée avec la flotte du Royaume-Uni et qui n'est pas présentée séparément.

## 6.2 Instability indices and trends in free-market prices for selected primary commodities 2000 = 100

### Sources:

- UNCTAD calculations based on UNCTAD *Commodity Price Statistics* on-line

### Notes:

- (1) Price instability indices and price trends reported here may not correspond to those published in the earlier issues of the *Handbook of Statistics*, since revised price indices, with a base year (2000=100), have been used for their calculations.

- (2) The measure of price instability is

$$1/n \sum_{t=1}^n \left[ \frac{|Y(t) - y(t)|}{y(t)} \right] * 100$$

where

$Y(t)$  is the observed magnitude of the variable.

$y(t)$  is the magnitude estimated by fitting an exponential trend to the observed value and

$n$  is the number of observations.

Accordingly, instability is measured as the percentage deviation of the variables concerned from their exponential trend levels for a given period.

- (3) The growth rate of each period has been calculated using the formula:

$$\log(p) = a + b(t)$$

where

$p$  is the price index and  $t$  is time.

- (4) Constant 2000 dollars (current dollars divided by the United Nations unit value index of manufactured goods exported by developed economies)

## 6.2 Indices d'instabilité et tendances des prix sur le marché libre d'une sélection de produits de base 2000 = 100

### Sources :

- Calculs du secrétariat de la CNUCED fondés sur les *Statistiques des prix des produits de base* en ligne de la CNUCED.

### Notes :

- (1) Les indices d'instabilité et les tendances des prix présentés ici ne correspondent pas à ceux publiés dans les versions antérieures du *Manuel de Statistiques*, car les indices des prix ont été révisés en utilisant 2000=100 comme année de base.

- (2) L'indice d'instabilité des prix est calculé selon

$$1/n \sum_{t=1}^n \left[ \frac{|Y(t) - y(t)|}{y(t)} \right] * 100$$

où

$Y(t)$  est la valeur observée de la variable.

$y(t)$  est la valeur estimée par ajustement à la tendance exponentielle des valeurs observées et

$n$  est le nombre d'observations.

L'instabilité est le pourcentage de déviation des variables en question par rapport à la ligne de tendance exponentielle pour une période donnée.

- (3) Le taux de croissance de chaque période a été calculé selon la formule :

$$\log(p) = a + b(t)$$

où

$p$  est l'indice de prix et  $t$  le temps.

- (4) Dollars constants 2000 (dollar courant divisé par l'index des Nations Unies de la valeur unitaire des exportations des produits manufacturés par les économies développées)

#### Notes:

- Quantities are averages of three continuous years, and are expressed in thousand metric tons, unless otherwise indicated.
- (1) Volume in gross weight
- (2) UNCTAD estimates based on the data from *World Mineral Production* and *World Mineral Statistics*. Volume in metal content. Data for 2006 is not available.
- (3) Only major consuming countries are reported. World and regional totals have been calculated by the UNCTAD secretariat, and include the data for countries which are not reported in this Handbook.
- (4) Volume in metal content
- (5) Includes production from both primary and secondary copper smelters

#### Notes :

- Les quantités représentent les moyennes de trois années continues et sont exprimées en milliers de tonnes métriques, sauf indication contraire.
- (1) Volume en poids brut
- (2) Les estimations de la CNUCED sont fondées sur les données des *World Mineral Production* et *World Mineral Statistics*. Les volumes sont exprimés en métal contenu. Les données pour 2006 ne sont pas disponibles.
- (3) Seuls les principaux pays consommateurs sont rapportés. Les totaux pour le monde et les totaux régionaux ont été calculés par le secrétariat de la CNUCED et incluent les données des pays qui ne sont pas déclarés dans ce Manuel.
- (4) Les volumes sont indiqués en métal contenu
- (5) Inclut la production des fonderies de cuivre de première et seconde fusion

### Notes:

(1),(2),(3) Goods (f.o.b.) and services

The goods component - data on f.o.b. basis - includes general merchandise, goods for processing (gross value of goods before and after processing), repairs on goods (value of repairs only), goods procured in ports and non-monetary gold. The services component comprises 11 main BPM5 categories: transportation, travel, communications, construction, insurance, financial services, computer and information services, royalties and licence fees, other business services, personal-cultural-recreational services, and government services n.i.e. The statistics on services trade are presented separately in tables 5.1 and 5.2.

The credit (export) figures related to goods in table 7.1 differ from those reported in table 1.1 because of adjustments for coverage, valuation, timing, inland freight, etc. Such adjustments are necessary to make the trade statistics compatible with the concepts used in the balance of payments. Further adjustments are applied in cases in which the market price for goods differs from the price used for customs purposes. The valuation problem is probably more important for imports (debits) than for exports and is likely to be a factor whenever there is a long delay between the date of sale and the date on which the import duty becomes payable. In addition, an adjustment is made to convert imports from a c.i.f. to an f.o.b. basis for those countries reporting imports c.i.f. The balance of trade is also evaluated f.o.b./f.o.b.

(4),(6) Income

Income figures shown on the debit side comprise compensation of non-resident employees and investment income payments on external financial assets and liabilities. Included in the investment income are payments on direct investment (columns 5 and 7), and portfolio and other investments. Column 4 presents total payments for income. Column 6 is a counterpart to column 4 and shows total receipts for income.

(5),(7) Direct investment income

The heading includes two categories: income on equity and income on debt, as income accruing to a direct investor residing in one economy from the ownership of direct investment capital in another economy. Income on direct investment is presented on a net basis for both direct investment abroad and in the reporting economy (i.e. receipts of income on equity and income on debt less payments on income on equity and income on debt for each).

(8) Current transfers

Transfers are defined as economic values exchanged without quid pro quo (without reciprocity). BPM5 distinguishes current and capital transfers. Current transfers comprise two main categories: general government and other transfers. General government transfers include transfers – in cash or in kind – between governments of different economies or between governments and international organizations (international cooperation). Other transfers occur between other sectors of the economy and non-residents of that economy and can take place between individuals, non-governmental institutions, organizations and groups. Workers' remittances also fall into this category.

### Notes :

(1),(2),(3) Biens (f.a.b.) et services

La partie relative aux biens comprend les marchandises générales, les biens importés ou exportés pour subir une transformation (valeur brute des biens avant et après transformation), la valeur des réparations de biens (seulement la valeur des réparations), les biens achetés dans les ports et l'or non-monnaire. La partie relative aux services couvre les 11 principales catégories selon le MBP5 : transports, voyages, communications, services de bâtiment et travaux publics, assurances, services financiers, services informatiques et d'information, redevances et droits de licence, autres services aux entreprises, services personnels, culturels et relatifs aux loisirs et services fournis ou reçus par les administrations publiques, n.c.a. Les données sur le commerce des services sont présentées séparément dans les tableaux 5.1 et 5.2.

Les chiffres relatifs aux exportations de biens dans le tableau 7.1 sont différents des données présentées dans le tableau 1.1. Ces différences sont dues principalement aux ajustements effectués sur la couverture, l'évaluation, la date d'enregistrement des transactions, le fret terrestre, etc. Les ajustements des données relatives aux importations et aux exportations sont nécessaires, car ils permettent de rendre les données du commerce extérieur compatibles avec les concepts employés dans les statistiques de balance des paiements. Les ajustements d'évaluation sont requis, en particulier dans les cas où les prix du marché auxquels les marchandises ont été vendues diffèrent des prix utilisés par les autorités douanières. Le problème d'évaluation est probablement plus important pour les importations que pour les exportations et devient un facteur sérieux lorsque s'écoule une longue période entre la date de vente et la date à laquelle les importations sont soumises aux droits de douane. Par ailleurs, les importations déclarées sur la base c.a.f. sont converties sur la base f.a.b. pour les pays qui rapportent c.a.f. La balance du commerce est aussi évaluée f.a.b./f.a.b.

(4),(6) Revenu

Les chiffres relatifs au revenu et présentés comme débit, comprennent la rémunération des salariés non-résidents et les paiements du revenu des investissements afférents aux avoirs ou engagements financiers extérieurs. Le revenu des investissements se subdivise en paiements provenant d'investissement direct (colonnes 5 et 7), d'investissement de portefeuille et d'autres investissements. La colonne 4 présente les paiements totaux du revenu et la colonne 6 les recettes totales des revenus.

(5),(7) Revenu d'investissement direct

Deux catégories figurent sous cette rubrique : titres de participation et titres de créance. Ils recouvrent les revenus qui rapportent à un investisseur direct, résidant dans une économie, des capitaux d'investissement direct qu'il possède dans une entreprise située dans une autre économie. Aussi bien pour les investissements directs à l'étranger que pour ceux de l'étranger, c'est le montant net des revenus que l'on reporte (autrement dit : dans chaque cas, les revenus perçus moins les revenus versés).

(8) Transferts courants

Les transferts sont définis comme des valeurs économiques échangées sans quid pro quo (sans réciprocité). MBP5 distingue les transferts courants et les transferts de capitaux. Les transferts courants se répartissent en deux grandes catégories sectorielles : les administrations publiques et les autres secteurs. Parmi les transferts courants des administrations publiques, on trouve les transferts – en espèces ou en nature – entre les administrations publiques de différentes économies ou entre les administrations publiques et les organisations internationales (coopération internationale). Les transferts d'autres secteurs s'opèrent entre tous les autres secteurs d'une économie et les non-résidents de celle-ci. Ils peuvent avoir lieu entre les particuliers, les institutions non-gouvernementales, les organisations et les groupes. Les envois de fonds des travailleurs sont également inclus sous cette rubrique.

## 7.2 Balance of payments: capital and financial account summaries

## 7.2 Balance des paiements : sommaires des comptes de capital et d'opérations financières

### Sources:

- International Monetary Fund (IMF), *Balance of Payments Statistics* on CD-ROM.

### Notes:

- (1) Capital account  
The capital account consists of capital transfers and of acquisition or disposal of non-produced, non-financial assets. Transfers refer to transactions exchanged without quid-pro-quo (without reciprocity). Capital transfers include transfers of ownership of fixed assets or of funds linked to acquisition or disposal of fixed assets. They further incorporate cancellations of liabilities by creditors, where the later receive no counterpart value. Acquisitions/disposals of non-produced, non-financial assets mainly refer to intangibles, such as patents, leases, and goodwill. Items are entered in capital account as net credits or debits. Column 1, as presented here, shows the total net amounts (net credits less net debits).
- (2),(3) Direct investment  
Within the financial account, direct investment is firstly split according to its direction into direct investment abroad (column 2) and direct investment in reporting economy (column 3). Further subdivisions include: direct investment in equity capital, reinvested earnings and other direct investment capital (inter-company transactions.)  
Direct investment is defined as investment that reflects a lasting interest of a resident entity of one economy (direct investor) in an entity resident in another economy (direct investment enterprise). It covers all the transactions between direct investors and direct investment enterprises. Direct investment implies a significant degree of influence by the investor on the management of the direct investment enterprise.
- (4),(5) Portfolio investment  
Within portfolio investment the distinction is being made between assets (column 4) and liabilities (column 5). Assets are claims on the rest of the world and liabilities represent indebtedness to the rest of the world. Portfolio investment covers transactions in equity securities and debt securities. The later are subdivided into bonds, notes, money market instruments and financial derivatives (when the derivatives generate financial claims or liabilities).
- (6),(7) Other investment  
Other investment is a residual category that covers all financial transactions not included under direct investment, portfolio investment or reserve assets. Assets (column 6) and liabilities (column 7) in this category are classified primarily on an instrument bases, such as trade credits, loans, currency and deposits.
- (8) Reserve assets  
Includes: monetary gold, special drawing rights, reserve position in the IMF, foreign exchange and other claims.
- (9) Financial account  
The financial account constituents are classified according to the type of investment or by a functional breakdown into four main components: direct investment, portfolio investment, other investment and reserve assets. Each component is further divided into relevant subcomponents. The sum of figures in columns 2 to 8 is equal to column 9 (financial account balance). Where the financial account subcomponents do not add up to the total net financial account, the difference can be attributed to financial derivatives that are not shown within this table.
- (11) The financial account total for the year 1990 does not add up to the total of its sub-components owing to data revision by the Japanese authorities; it is recommended to use the financial account sum as given rather than to sum up the sub-components for this year.
- (12) Including United States Virgin Islands

### Notes :

- (1) Compte de capital  
Le compte de capital est subdivisé en transferts de capital et en acquisitions ou cessions d'avoirs non-financiers non-produits. Les transferts sont les transactions échangées sans quid-pro-quo (sans réciprocité.) Les transferts de capitaux comprennent les transferts de propriété d'un actif fixe ou les transferts de fonds liés à l'acquisition ou à la cession d'un actif fixe. De plus, ils incorporent la remise d'une dette par un créancier, sans que celui-ci ne reçoive une valeur équivalente. Les acquisitions ou cession d'avoirs non-financiers non-produits se réfèrent aux avoirs incorporels tels que les brevets, les contrats de location et marques. Les éléments du compte de capital sont reportés comme les crédits ou les débits nets. La colonne (1) présente les totaux (crédits nets moins débits nets).
- (2),(3) Investissement direct  
Dans le Compte financier, l'investissement direct est d'abord divisé en fonction du sens des mouvements de capitaux entre investissement de l'économie déclarante à l'étranger (colonne 2) et celui en provenance de l'étranger investi dans l'économie déclarante (colonne 3). Les subdivisions suivantes incluent : capital social, bénéfices réinvestis et autres transactions. L'investissement direct étranger est accompagné d'un intérêt durable de la part d'une entité résidente d'une économie (l'investisseur direct) pour une entité résidente d'une autre économie (l'entreprise d'investissement direct.) Il recouvre toutes les transactions entre les investisseurs directs et les entreprises d'investissement direct. L'investissement direct donne à l'investisseur le privilège d'exercer une influence significative sur la gestion de l'entreprise dans laquelle il a investi.
- (4),(5) Investissement de portefeuille  
En investissement de portefeuille on distingue les avoirs (colonne 4) et les engagements (colonne 5). Les avoirs représentent les créances sur les non-résidents et les engagements les endettements envers les non-résidents. Les investissements de portefeuille couvrent les transactions portant sur les titres de participation et les titres de créances, ces dernières étant subdivisées en trois catégories : obligations et autres titres d'emprunt, instruments du marché monétaire et produits financiers dérivés (lorsque les dérivés résultent en créances ou en engagements financiers).
- (6),(7) Autres investissements  
Les autres investissements constituent une catégorie résiduelle qui comprend toutes les opérations sur actifs et passifs financiers qui ne figurent pas parmi les investissements directs, les investissements de portefeuille ou les avoirs de réserve. Les avoirs (colonne 6) et les engagements (colonne 7) sont répartis par instruments tels que les crédits commerciaux, les prêts, la monnaie fiduciaire et les dépôts.
- (8) Avoirs de réserve  
Comprend : l'or monétaire, droits de tirage spéciaux, position de réserve dans le FMI, devises et autres créances.
- (9) Compte financier  
Les éléments qui constituent le compte financier se divisent selon le type d'investissement ou selon une ventilation fonctionnelle en quatre principaux composants : investissements directs, investissements de portefeuille, autres investissements et avoirs de réserve. Chaque composant comprend plusieurs sous-groupes. La somme de tous les chiffres des colonnes 2 à 8 est égale à la colonne 9 (balance du compte financier). Dans le cas où la somme des éléments du compte financier ne correspond pas au total, la différence peut être attribuée aux instruments financiers dérivés, qui ne sont pas présentés dans ce tableau.
- (11) Les données du compte financier net pour l'année 1990 ne correspondent pas à la somme des composants du compte financier à cause de révision des statistiques nationales du Japon ; il est préconisé d'utiliser les chiffres fournis pour ladite série, plutôt que de calculer la somme d'éléments composants pour cette année.
- (12) Y compris les Îles Vierges américaines

Notes:

(1) Data for 1990 refer to Slovenia only, except for the FDI inflows that also cover other Republics of the former SFR Yugoslavia.

FDI inward flows and outward flows comprise capital provided (either directly or through other related enterprises) by a foreign direct investor to a FDI enterprise, or capital received by a foreign direct investor from a FDI enterprise. FDI includes the three following components: equity capital, reinvested earnings and intra-company loans.

- Equity capital is the foreign direct investor's purchase of shares of an enterprise in a country other than that of its residence.

- Reinvested earnings comprise the direct investor's share (in proportion to direct equity participation) of earnings not distributed as dividends by affiliates or earnings not remitted to the direct investor. Such retained profits by affiliates are reinvested.

- Intra-company loans or intra-company debt transactions refer to short- or long-term borrowing and lending of funds between direct investors (parent enterprises) and affiliate enterprises.

Data on FDI flows are presented on net bases (capital transactions' credits less debits between direct investors and their foreign affiliates). Net decreases in assets or net increases in liabilities are recorded as credits (with a positive sign), while net increases in assets or net decreases in liabilities are recorded as debits (with a negative sign). Hence, FDI flows with a negative sign indicate that at least one of the three components of FDI is negative and not offset by positive amounts of the remaining components. These are called reverse investment or disinvestment.

Notes :

(1) Les données pour 1990 se réfèrent seulement à la Slovaquie, à l'exception des flux entrants qui comprennent aussi d'autres Républiques de l'ex Yougoslavie (RSF).

Les flux entrants et sortants de l'IDE comprennent les capitaux fournis par l'investisseur direct (soit directement, soit par l'intermédiaire d'autres entreprises avec lesquelles il est lié) à l'entreprise d'investissement direct ou les capitaux reçus de cette entreprise par l'investisseur. L'IDE est composé des trois catégories suivantes : le capital social, les bénéfices réinvestis et les emprunts intra-compagnie.

- Le capital social inclut l'achat des actions d'une entreprise située à l'étranger par l'investisseur direct résident dans l'économie déclarante.

- Les bénéfices réinvestis correspondent à la part qui revient à l'investisseur direct (au prorata de sa participation directe au capital) sur les bénéfices qui ne sont pas distribués sous forme de dividendes par les entreprises apparentées, ainsi que les bénéfices des succursales qui ne sont pas versés à l'investisseur direct. Ces bénéfices retenus par les affiliés sont réinvestis.

- Les emprunts intra-compagnie ou les transactions intra-compagnie concernant les dettes ou les créances se réfèrent aux emprunts et prêts des fonds à court- ou long-terme entre l'investisseur direct (entreprise parente) et les entreprises apparentées (affiliées).

Les données sur l'IDE se présentent sur une base nette (les crédits moins les débits des transactions en capital entre l'investisseur direct et son entreprise apparentée). Les augmentations nettes en passifs et les décroissances nettes en actifs se déclarent comme crédits (avec le signe positif), tandis que les augmentations nettes en actifs et les décroissances nettes en passifs se déclarent comme débits (avec le signe négatif). Par conséquent, les flux de l'IDE avec un signe négatif indiquent qu'au moins une des trois catégories de l'IDE est négative et n'est pas contrebalancée par les valeurs positives des autres catégories. Il s'agit alors de désinvestissements ou de réductions d'investissement.

Notes:

(a) Data refers to South Africa Customs Union (Botswana, Lesotho, Namibia, South Africa and Swaziland)

(1) End of year data.

(2) Reserve stock of the year, divided by the average monthly imports of the current year. Data on imports are based on figures shown in table 1.1.1.

(3) Reserves data have been revised starting with 1996 because national financial authorities modified their methodology for classification of foreign assets.

## 7.6.1 Official financial flows from bilateral and multilateral sources to developing economies by country and geographical region

## 7.6.1 Flux financiers publics bilatéraux et multilatéraux à destination des économies en développement par pays et régions géographiques

### Sources:

- International Development Statistics, Organisation for Economic Co-operation and Development (OECD)

### Notes:

- (1) Sum of "Total ODA/OA Net; total donors" and "Total OOF Net; total donors". It represents the total net disbursements by the official sector at large to the recipient country.
- (2) Total ODA Net; total donors:  
The Total Official Development Assistance (ODA) includes grants and loans to countries and territories on Part I of the "DAC List of Aid Recipients" which are:  
undertaken by the official sector; with promotion of economic development and welfare as the main objective and at concessional financial terms (if a loan, have a grant element of at least 25 per cent).  
Grants, loans and credits for military purposes are excluded.

"Total donors" is the sum of the three following donor types:

- DAC Bilateral donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 Member countries.
- Multilateral donors (i.e. African Development Bank, International Bank for Reconstruction and Development, International Monetary Fund, United Nations Development Programme).
- Other donors: the non-DAC Bilateral donors (i.e. Hungary, Lithuania, Turkey).

- (3) Total OOF Net; total donors:  
The Other Official Flows (OOF) are transactions by the official sector whose main objective is other than development motivated, or, if development motivated, whose grant element is below the 25% threshold which would make them eligible to be recorded as ODA. The main classes of transactions included here are official export credits, official sector equity and portfolio investment, and debt reorganisation undertaken by the official sector at non-concessional terms (irrespective of the nature or the identity of the original creditor).

Total donors is the sum of the three following donor types:

- DAC Bilateral donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 Member countries.
- Multilateral donors (i.e. African Development Bank, International Bank for Reconstruction and Development, International Monetary Fund, United Nations Development Programme).
- Other donors: the non-DAC Bilateral donors (i.e. Hungary, Lithuania, Turkey).

### Notes :

- (1) Somme de "APD/AP totale nette ; tous donateurs" et de "Flux AASP nets ; tous donateurs". Cet agrégat correspond aux versements nets effectués par le secteur public dans son ensemble aux pays bénéficiaires considérés.
- (2) AP totale nette ; tous donateurs :  
Par aide publique (AP), on entend l'ensemble des apports de ressources qui sont fournis aux pays qui figurent à la Partie II de la "Liste des bénéficiaires de l'aide établie par le CAD" et qui répondent aux critères suivants :  
a) être dispensés dans le but essentiel de favoriser le développement économique et l'amélioration du niveau de vie dans les pays en développement ; et  
b) revêtir un caractère de faveur et comporter un élément de libéralité d'au moins 25 pour cent.

"Tous donateurs" est la somme des 3 types de donateurs suivants :

- Donneurs bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.
- Donneurs multilatéraux (i.e. Banque africaine de développement, Banque internationale pour la reconstruction et le développement, Fonds monétaire international, Programme des Nations Unies pour le développement).
- Autres donateurs : les donateurs bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).

- (3) Flux AASP nets ; tous donateurs :  
Autres apports du secteur public (AASP) : il s'agit des opérations du secteur public dont le but essentiel est autre que le développement ou qui, tout en visant à favoriser le développement, sont assorties d'un élément de libéralité inférieur au seuil de 25 pour cent à partir duquel elles auraient pu être notifiées comme de l'APD. Les principales catégories d'opérations couvertes dans les AASP sont les crédits publics à l'exportation, les prises de participation et les investissements de portefeuille du secteur public et le réaménagement de la dette effectué par le secteur public aux conditions du marché (et ce, quelle que soit la nature ou l'identité du créancier initial).

Tous donateurs est la somme des 3 types de donateurs suivants :

- Donneurs bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.
- Donneurs multilatéraux (i.e. Banque africaine de développement, Banque internationale pour la reconstruction et le développement, Fonds monétaire international, Programme des Nations Unies pour le développement).
- Autres donateurs : les donateurs bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).

## 7.6.2 Official financial flows from bilateral and multilateral sources to developing economies by economic grouping

### Sources:

- International Development Statistics, Organisation for Economic Co-operation and Development (OECD)

### Notes:

- The groupings presented in this table do not include Unallocated/Unspecified recipient countries.

(1) Sum of "Total ODA/OA Net; total donors" and "Total OOF Net; total donors". It represents the total net disbursements by the official sector at large to the recipient country.

(2) Total ODA Net; total donors:  
The Total Official Development Assistance (ODA) includes grants and loans to countries and territories on Part I of the "DAC List of Aid Recipients" which are: undertaken by the official sector; with promotion of economic development and welfare as the main objective and at concessional financial terms (if a loan, have a grant element of at least 25 per cent).  
Grants, loans and credits for military purposes are excluded.

"Total Donors" is the sum of the three following donor types:

- DAC Bilateral Donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 Member countries.

- Multilateral Donors (i.e. African Development Bank, International Bank for Reconstruction and Development, International Monetary Fund, United Nations Development Programme).

- Other Donors: the Non-DAC Bilateral Donors (i.e. Hungary, Lithuania, Turkey).

(3) Total OOF Net; total donors:  
The Other Official Flows (OOF) are transactions by the official sector whose main objective is other than development motivated, or, if development motivated, whose grant element is below the 25% threshold which would make them eligible to be recorded as ODA. The main classes of transactions included here are official export credits, official sector equity and portfolio investment, and debt reorganisation undertaken by the official sector at non-concessional terms (irrespective of the nature or the identity of the original creditor).

Total Donors is the sum of the three following donor types:

- DAC Bilateral Donors: The Development Assistance Committee (DAC) is the Committee of the OECD which deals with development co-operation matters. It consists of 23 Member countries.

- Multilateral Donors (i.e. African Development Bank, International Bank for Reconstruction and Development, International Monetary Fund, United Nations Development Programme).

- Other Donors: the Non-DAC Bilateral Donors (i.e. Hungary, Lithuania, Turkey).

## 7.6.2 Flux financiers publics bilatéraux et multilatéraux à destination des économies en développement par groupements économiques

### Sources :

- Statistiques sur le développement international, Organisation de coopération et de développement économique (OCDE)

### Notes :

- Les groupements présentés dans ce tableau n'incluent pas les pays bénéficiaires non-ventilé/non-spécifié.

(1) Somme de "APD/AP totale nette ; tous donateurs" et de "Flux AASP nets ; tous donateurs". Cet agrégat correspond aux versements nets effectués par le secteur public dans son ensemble aux pays bénéficiaires considérés.

(2) AP totale nette ; tous donateurs :  
Par aide publique (AP), on entend l'ensemble des apports de ressources qui sont fournis aux pays qui figurent à la Partie II de la "Liste des bénéficiaires de l'aide établie par le CAD" et qui répondent aux critères suivants :  
a) être dispensés dans le but essentiel de favoriser le développement économique et l'amélioration du niveau de vie dans les pays en développement ; et  
b) revêtir un caractère de faveur et comporter un élément de libéralité d'au moins 25 pour cent.

"Tous Donneurs" est la somme des 3 types de donateurs suivants :

- Donneurs Bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.

- Donneurs Multilatéraux (i.e. Banque africaine de développement, Banque internationale pour la reconstruction et le développement, Fonds monétaire international, Programme des Nations Unies pour le développement).

- Autres Donneurs : les Donneurs Bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).

(3) Flux AASP nets ; tous donateurs :  
Autres apports du secteur public (AASP) : il s'agit des opérations du secteur public dont le but essentiel est autre que le développement ou qui, tout en visant à favoriser le développement, sont assorties d'un élément de libéralité inférieur au seuil de 25 pour cent à partir duquel elles auraient pu être notifiées comme de l'APD. Les principales catégories d'opérations couvertes dans les AASP sont les crédits publics à l'exportation, les prises de participation et les investissements de portefeuille du secteur public et le réaménagement de la dette effectué par le secteur public aux conditions du marché (et ce, quelle que soit la nature ou l'identité du créancier initial).

Tous Donneurs est la somme des 3 types de donateurs suivants :

- Donneurs Bilatéraux du CAD : Le Comité d'aide au développement (CAD) est la principale instance chargée, à l'OCDE, des questions relatives à la coopération avec les pays en développement. Le CAD regroupe 23 pays membres.

- Donneurs Multilatéraux (i.e. Banque africaine de développement, Banque internationale pour la reconstruction et le développement, Fonds monétaire international, Programme des Nations Unies pour le développement).

- Autres Donneurs : les Donneurs Bilatéraux non-membres du CAD (i.e. Hongrie, Lituanie, Turquie).

### Notes:

- (1) Public and publicly guaranteed debt (PPG) are aggregated.
  - Public debt is an obligation of a public debtor, including the national government, a political subdivision (or an agency of either), and autonomous public bodies.
  - Publicly guaranteed debt is an external obligation of a private debtor that is guaranteed for repayment by a public entity.Data is shown by type of creditor: official creditors and private creditors.
- (2) Public and publicly guaranteed debt from official creditors includes loans from Governments and loans from international organizations .  
Government loans include loans from governments and their agencies (including central banks), loans from autonomous bodies, and direct loans from official export credit agencies.  
Loans from international organizations include loans and credits from the World Bank, regional development banks, and other multilateral and intergovernmental agencies.  
Excluded are loans from funds administered by an international organization on behalf of a single donor Government; these are classified as loans from Governments.  
In this table, Governments are treated as bilateral creditors and international organizations are treated as multilateral creditors.
- (3) Public and publicly guaranteed debt from private creditors includes:
  - Bonds that are either publicly issued or privately placed;
  - Commercial bank loans from private banks and other private financial institutions;
  - Other private credits from manufacturers, exporters, and other suppliers of goods, and bank credits covered by a guarantee of an export credit agency.
- (4) Private nonguaranteed debt (PNG) is an obligation of a private debtor that is not guaranteed for repayment by a public entity.
- (5) Long-term debt is defined as debt that has an original or extended maturity of more than one year and that is owed to nonresidents and repayable in foreign currency, goods, or services. Long-term debt has three components: Public debt, Publicly guaranteed debt, and Private nonguaranteed debt.  
Total outstanding long term debt at year end is long-term debt outstanding and disbursed.
- (6) Disbursements on long-term debt are drawings on loan commitments during the year specified.
- (7) Long-term debt service payments are the sum of principal repayments and interest payments in the year specified.
- (8) Net transfers are disbursements minus debt service payments.

### Notes :

- (1) La dette publique et garantie par l'État est une aggrégation de 2 composantes :
  - La dette publique qui est une dette contractée par le secteur public, y compris le gouvernement, une entité politique et d'autres organismes publics autonomes.
  - La dette garantie par l'État qui est une dette contractée par le secteur privé, dont l'amortissement est garanti par une entité publique.Les données sont indiquées par type de créanciers : créanciers publics et créanciers privés.
- (2) La dette publique et garantie par l'État octroyée par les créanciers publics inclut les prêts des gouvernements et les prêts des organisations internationales.  
Les prêts des gouvernements incluent les prêts des gouvernements et des organismes publics (y compris les banques centrales), les prêts provenant d'entités autonomes et les prêts octroyés directement par des organismes publics de crédits à l'exportation.  
Les prêts des organisations internationales incluent les prêts et les crédits de la Banque mondiale, des banques régionales de développement, et d'autres organismes multilatéraux et intergouvernementaux. Ne sont pas compris les prêts provenant des fonds administrés par une organisation internationale, pour le compte d'un gouvernement ; ceux-ci sont classés sous la rubrique des prêts des gouvernements.  
Dans ce tableau, les gouvernements sont appelés créanciers bilatéraux et les organisations internationales sont appelées créanciers multilatéraux.
- (3) La dette publique et garantie par l'État octroyée par les créanciers privés, comprend :
  - Les obligations qui sont soit des émissions publiques, soit des placements privés ;
  - Les prêts des banques commerciales octroyés par des banques privées et par d'autres entités financières ;
  - Les autres crédits privés provenant du secteur manufacturier, du secteur des exportations, et d'autres fournisseurs de biens, ainsi que des crédits bancaires couverts par un organisme de crédits à l'exportation.
- (4) La dette du secteur privé non garantie est une dette contractée par le secteur privé, dont l'amortissement n'est pas garanti par une entité publique.
- (5) La dette à long terme a une durée de remboursement (d'origine ou différée) supérieure à une année, et son amortissement est dû, en monnaies convertibles ou en nature, à des créanciers non-résidents. La dette à long terme a trois composantes : dette publique, dette garantie par l'État et dette du secteur privé non garantie.  
L'encours total de la dette à long terme à la fin de l'année est la somme de l'encours de la dette à long terme et de la dette décaissée à long terme.
- (6) Les décaissements de la dette à long terme sont les tirages sur les engagements de la dette effectués au cours de l'année spécifiée.
- (7) Les paiements du service de la dette à long terme sont la somme du remboursement du principal et du paiement des intérêts, effectués au cours de l'année spécifiée.
- (8) Les transferts nets sont les décaissements moins les paiements du service de la dette.

### Notes:

- (a) Including Taiwan
- (1) Population growth rate: Average exponential rate of growth of the population over a given period. It is calculated as  $\ln(P_t/P_0)/t$  where  $t$  is the length of the period. It is expressed as a percentage.
  - (2) Natural increase rate per 1 000 inhabitants: Crude birth rate minus the crude death rate.
  - (3) Net migration rate per 1 000 inhabitants: Net number of migrants over a given period divided by the person-years lived by the population over that period. It is expressed as net number of migrants per 1 000 population.
  - (4) Crude birth rate per 1 000 inhabitants: Number of births over a given period divided by the person-years lived by the population over that period. It is expressed as number of births per 1 000 population.
  - (5) Crude death rate per 1 000 inhabitants: Number of deaths over a given period divided by the person-years lived by the population over that period. It is expressed as number of deaths per 1 000 population.
  - (6) Infant mortality rate per 1 000 live births: The number of deaths under one year of age in a given period of time divided by the number of live-births in the same period. It is expressed as number of deaths under one year per 1 000 births.
  - (7) Life expectancy at birth: The average number of years a newborn infant would be expected to live if current mortality trends were to continue for the rest of that person's life.

### Notes :

- (a) Y compris Taïwan
- (1) Taux d'accroissement de la population : le taux exponentiel d'accroissement de la population pour une période donnée, calculé comme  $\ln(P_t/P_0)/t$ , où  $t$  est la longueur de la période, et exprimé en pourcentage.
  - (2) Taux d'évolution naturelle pour 1 000 habitants : le taux de natalité brut moins le taux de mortalité brut.
  - (3) Taux net de migration pour 1 000 habitants : le rapport entre le nombre net des migrants pour une période donnée et l'effectif de la population vivant durant la période considérée. Il est exprimé en nombre net des migrants pour 1 000 habitants.
  - (4) Taux de natalité brut pour 1 000 habitants : le rapport entre le nombre de naissances vivantes pour une période donnée et l'effectif de la population durant la période considérée. Il est exprimé en nombre de naissances pour 1 000 habitants.
  - (5) Taux de mortalité brut pour 1 000 habitants : c'est le rapport entre le nombre de décès pour une période donnée et l'effectif de la population durant la période considérée. Il est exprimé en nombre de décès pour 1 000 habitants.
  - (6) Taux de mortalité infantile pour 1 000 naissances vivantes : il est défini par le nombre des décès d'enfants âgés de moins d'un an pour une période donnée, rapporté au nombre de naissances vivantes durant la période considérée. Il est exprimé en nombre de décès d'enfants âgés de moins d'un an pour 1 000 naissances.
  - (7) Espérance de vie à la naissance : nombre moyen d'années à vivre pour un nouveau-né soumis aux conditions de mortalité de l'année de sa naissance.

### Notes:

- (1) Population growth rate: Average exponential rate of growth of the population over a given period. It is calculated as  $\ln(P_t/P_0)/t$  where  $t$  is the length of the period. It is expressed as a percentage.
- (2) Natural increase rate per 1 000 inhabitants: Crude birth rate minus the crude death rate.
- (3) Net migration rate per 1 000 inhabitants: Net number of migrants over a given period divided by the person-years lived by the population over that period. It is expressed as net number of migrants per 1 000 population.
- (4) Crude birth rate per 1 000 inhabitants: Number of births over a given period divided by the person-years lived by the population over that period. It is expressed as number of births per 1 000 population.
- (5) Crude death rate per 1 000 inhabitants: Number of deaths over a given period divided by the person-years lived by the population over that period. It is expressed as number of deaths per 1 000 population.
- (6) Infant mortality rate per 1 000 live births: The number of deaths under one year of age in a given period of time divided by the number of live-births in the same period. It is expressed as number of deaths under one year per 1 000 births.
- (7) Life expectancy at birth: The average number of years a newborn infant would be expected to live if current mortality trends were to continue for the rest of that person's life.

### Notes :

- (1) Taux d'accroissement de la population : le taux exponentiel d'accroissement de la population pour une période donnée, calculé comme  $\ln(P_t/P_0)/t$ , où  $t$  est la longueur de la période, et exprimé en pourcentage.
- (2) Taux d'évolution naturelle pour 1 000 habitants : le taux de natalité brut moins le taux de mortalité brut.
- (3) Taux net de migration pour 1 000 habitants : le rapport entre le nombre net des migrants pour une période donnée et l'effectif de la population vivant durant la période considérée. Il est exprimé en nombre net des migrants pour 1 000 habitants.
- (4) Taux de natalité brut pour 1 000 habitants : le rapport entre le nombre de naissances vivantes pour une période donnée et l'effectif de la population durant la période considérée. Il est exprimé en nombre de naissances pour 1 000 habitants.
- (5) Taux de mortalité brut pour 1 000 habitants : c'est le rapport entre le nombre de décès pour une période donnée et l'effectif de la population durant la période considérée. Il est exprimé en nombre de décès pour 1 000 habitants.
- (6) Taux de mortalité infantile pour 1 000 naissances vivantes : il est défini par le nombre des décès d'enfants âgés de moins d'un an pour une période donnée, rapporté au nombre de naissances vivantes durant la période considérée. Il est exprimé en nombre de décès d'enfants âgés de moins d'un an pour 1 000 naissances.
- (7) Espérance de vie à la naissance : nombre moyen d'années à vivre pour un nouveau-né soumis aux conditions de mortalité de l'année de sa naissance.
